## NO SHORTCUTS

Like the modest champion sitting in the corner, SCOTT quietly lets its achievements, its victories, its skills speak for themselves. We don't make products for those who yearn to be noticed. We make them for those who are going to do what they do whether there's anyone watching or not. If you're like us, you say what you say, do what you do, ski where you ski because you love it. You do it the right way. You do it for the right reasons.

## SCOTT WINTERSPORTS

Sometimes it's the pursuit. Sometimes it's the rush. Sometimes it's pure instinct that drives you. All you know is that you have to get out there. You feel it when you fall asleep... and when you wake up, you feel it even more. We put everything we have into making equipment so good that nothing can distract you from those experiences on the mountain – so that your mind and body can stay in sync from the moment you click into your skis to the moment you catch your breath, ready to do it all over again. Whether it's the optical precision of our goggles or the carefully balanced combination of stiffness, flex and stability that create the right skis for your style, we don't cut corners. There are no shortcuts to perfection. And that's why we can honestly say our products create a link between you and the mountain. It's what you live for. We never forget that.

# PROUD PARTNERS

SCOTT Sports is proud to be named as Official Premium Partner of the Freeride World Tour. "The FWT is the worldwide circuit of freeride snowboarding and skiing with the best riders in the world competing on the most legendary and challenging alpine faces at the most renowned ski resorts across the world." – Freeride World Tour

# COLORWAYS 2025

## MEN COLLECTION

## WOMEN COLLECTION

### FOUNDATIONAL / ESSENTIAL

The foundational/essential colour group represents peacefulness and serenity. When you're among noise and distractions, these colours provide a sense of serenity, reassurance and stability. The fresh green and meadow green invites you to play and escape in the outdoor environments. The dark blue, grounding bread brown and revitalizing fresh green advocates our well-being in the mountains.

### NATURE / EVOLUTION

The nature/evolution colour group represents self-expression, joy and freedom. Touching on neutral colours with douglas green, dust grey and dust white, we bring a hint of hope in a world vying for our attention. These neutrals colours bring a calming mood to explore the outdoors.

### ENERGY/ ACTIVE

The energy/active colour group for women is a mix between stability with the dust white, virtues of balance with the power red and mystery with the rich purple. These colours all combine to capture our imagination and bring a desire for escapism. For men, the flash orange is the colour of optimism and positivity, in addition to bread brown/black inspired by natural materials, these colours offer warmth, positivity and energy.

# CROSS MERCHANDISING

GREAT ALONE, BETTER TOGETHER

In order to provide the end consumer with the ultimate in style, comfort and innovation, SCOTT has engineered helmets and goggles to fit seamlessly together. Designed to fit perfectly and to create a great shopping experience, these clever products will save both you and the end-consumer time, by simplifying decision-making and orders with pre-defined and stylish combos

# RE-SOURCE BY SCOTT

It is an important step for us in becoming a responsible steward of our planet and society. We look forward to improving our practices in each of these fields.

57 TONS OF CO<sup>2</sup>

COMPENSATED FOR OUR  
ATHLETE'S TRAVEL IN  
PARTNERSHIP WITH  
ALMIGHTY TREE.

## SUSTAINABLE DEVELOPMENT GOALS

### PEOPLE

We consider that all people involved in our supply chain should be treated fairly with dignity and respect.

### PLANET

We take into consideration that the earth's resources must be used in such a way that ecosystems and future generations shouldn't be adversely affected.

### PRODUCTS

We aim to maximize the sustainable nature of our products while still maintaining their high level of performance through innovation, technology and design.

REDUCED INEQUALITIES

CLEAN WATER & SANITATION

SUSTAINABLE CITIES & COMMUNITIES

PARTNERSHIP FOR THE GOALS

RESPONSIBLE CONSUMPTION & PRODUCTION

DECENT WORK & ECONOMIC GROWTH

CLIMATE ACTION

## WHAT IS RE-SOURCE BY SCOTT FOR HARDGOODS

Re-source by SCOTT hardgoods products are defined by the use of recycled, bio-based and/or renewable materials certified by third-parties, representing a minimum of 50% more eco-responsible materials by weight.

### COSMOS RE-SOURCE

This first foray in using more ECO responsible materials in our skiboots has enabled us to add another product in the re-source by SCOTT family. With a mixture of biobased and recycled materials reaching 50% of the product weight. The COSMOS ECO is a great first step towards the future.

### SCOTT AIRFLOW & AIRFLOW PRO PROTECTION

The Airflow & Airflow Pro protection are ready to keep you safe no matter what skiing adventure you go on, whilst reducing the impact on our winter playground. Made from partially biobased materials and combined with a garment made from recycled materials, our Airflow & Airflow Pro products meet our requirements of having more than 50% of the product weight coming from 3rd party certified more responsible sources.

### SCOTT PURE TOUR SKI

The SCOTT Pure Tour Ski is a step forward in ski sustainability. This product includes a 100% -certified wood core and 100% -European flax fibers reinforcement. As well as this, the ski has partially recycled edges, titanal reinforcement plate, side walls and base. By weight, more than 40% of the product is made from eco-responsible material.

### SCOTT FLOW PLUS PRO HELMET

The SCOTT Flow Plus Pro is a freeride helmet with features galore to keep you safe and comfortable during your rides. This new helmet in our range also offers many sustainability features: min 50% recycled EPS; 100% recycled PC shell a first in our industry; 100% recycled straps. This helmet is a next step in finding new materials and ways to reduce the impact that we have on our playgrounds.

### COULOIR TOUR

A lightweight, touring-specific winter helmet used by our most winter athletes. Designed to work with a beanie. The EPS, straps and vent plates are all made using recycled waste. This helmet keeps you safe and helps lessen our impacts on our playground.

Although we have criteria for Re-source products in Hardgoods, it is not always easy to achieve this criteria. Here are some of the other impressive product developments from our teams.

---

**INDEX**

SIZE CHART SKIS

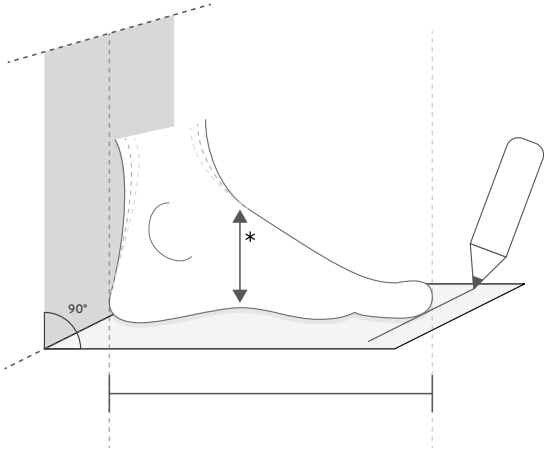

Ski selection is a very subjective and personal decision. It's determined according to the usage, the weight, the height, the skiing style and the physical ability of the skier.

|              | TOURING             | ALL MOUNTAIN (<90 MM) | FREERIDE (>90 MM)  |
|--------------|---------------------|-----------------------|--------------------|
| BEGINNER     | YOUR HEIGHT - 10 CM | YOUR HEIGHT - 15 CM   | YOUR HEIGHT - 5 CM |
| INTERMEDIATE | YOUR HEIGHT - 7 CM  | YOUR HEIGHT - 10 CM   | YOUR HEIGHT        |
| EXPERIENCED  | YOUR HEIGHT - 5 CM  | YOUR HEIGHT - 5 CM    | YOUR HEIGHT        |
| EXPERT       | YOUR HEIGHT         | YOUR HEIGHT           | YOUR HEIGHT + 5 CM |

SIZE CHART BOOTS

How to know your foot size in mondo size?

- Put two sheets of paper against a wall and take a pencil.
- Place your feet on the sheets of paper with your heel touching the wall.
- Make sure your feet are naturally spaced, i.e. the same width as your hips.
- Bend your knees slightly and outline your toes with a pencil.
- Take the longest measurement in centimetres and transfer it to the size chart.

| MEASUREMENT IN CM |      | RECO MMENDATION IN MONDO SIZE |
|-------------------|------|-------------------------------|
| FROM              | TO   |                               |
| 23                | 23,4 | 23                            |
| 23,5              | 23,9 | 23,5                          |
| 24                | 24,4 | 24                            |
| 24,5              | 24,9 | 24,5                          |
| 25                | 25,4 | 25                            |
| 25,5              | 25,9 | 25,5                          |
| 26                | 26,4 | 26                            |
| 26,5              | 26,9 | 26,5                          |
| 27                | 27,4 | 27                            |
| 27,5              | 27,9 | 27,5                          |
| 28                | 28,4 | 28                            |
| 28,5              | 28,9 | 28,5                          |
| 29                | 29,4 | 29                            |
| 29,5              | 29,9 | 29,5                          |
| 30                | 30,4 | 30                            |
| 30,5              | 30,9 | 30,5                          |
| 31                | 31,4 | 31                            |
| 31,5              | 31,9 | 31,5                          |

NB:  
If you have a low instep, always take the rounded size.  
Example: My feet measure 27.8 cm and I have a low instep: I will choose size 27.0.

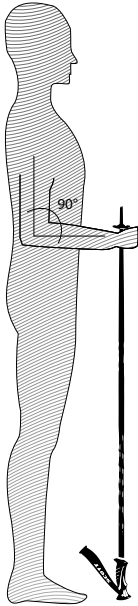

If you have a high instep, always take the half size.  
Example: My feet measure 27.2 cm and I have a high instep: I will choose size 27.5.

\*instep height

SIZE CHART POLES

For Touring we reco mmend the usage of telescopic pole. For Freeride, we reco mmend 10 to 20 cm less of the reco mmended size. Your pole size might change according to your ski style and your body geometry.

| SKIERS HEIGHT (CM) | CM  | IN  |
|--------------------|-----|-----|
| 100                | 70  | 27" |

GLOSSARY

SKIS

**PURE SIDE CUT**  
Inspired by Jérémie, the Pure Freeride Sidecut provides both stability and maneuverability. A shorter radius at the front than at the back with a long radius underfoot makes the ski agile in any condition.

**3DIMENSION TOURING SIDE CUT**  
The 3Dimensional Touring Sidecut is a revolutionary design for a better touring tuning, that combines a tip and tail radius with either a central flat line, or a small amount of sidecut under foot. The tip and tail radius allow for easy turn initiation while the flat line or a larger radius provides stability, power and precise edge hold. In addition to the new 3 Dimension Touring sidecut, our established 3Dimension Sidecut increases the skiability and performance in our freeride skis. In addition to the new 3Dimension Touring sidecut our established 3Dimension Sidecut increases the skiability and performance in our freeride skis.

**SPIN TECH**  
The new Spin tech is designed exclusively for SEA skis, this innovative 3D rocker is integrated into the tip and tail. Crafted for effortless pivot, seamless edge transition and maximum playfulness. It makes every ride a breeze, no matter the terrain.

**AIR TEC CONSTRUCTION**  
Air Tec technology reduces weight by removing material where it is least needed. The grooves along the base side of the wood core make the ski 10% lighter while maintaining its full performance and agility.

**RENTAL TOP SHEET**  
The Rental Top Sheet minimizes the contact with the foil top by using little hole patterns to disperse potential scratches and abrasions. The result is increased durability, ideal for rental shop use.

BOOTS

**CERTIFIED DYNAFIT® INSERTS**  
SCOTT ski touring boots use certified Dynafit® tech inserts for consistent quality, security, and compatibility with tech bindings.

**GRIPWALK®**  
The Gripwalk® rubber sole is a distinctive touring and mountaineering ski boot feature. The thin but robust rubber accomplishes precise movements on any terrain.

**VIBRAM OUTSOLE**  
The Vibram outsole ensures maximum grip when scrambling over any terrain that isn't snow. The Vibram composition provides durability and superior edging power while giving maximum grip for scrambling.

**RE-SOURCE**  
At SCOTT, we believe of doing things the right way and for the right reasons. We are committed to improving the impacts of our products and business practices, preserving the environment for future generations and stimulating positive change in our communities.

POLES

**S4**  
SCOTT aluminum ski poles undergo an electrostatic paint process, delivering a clean, contemporary, highly durable finish. They are constructed with the strongest aircraft-grade aluminum-zinc alloy commercially available, which has been heat treated and aged in order to confer its excellent properties. S4 aluminum poles are twice as strong as the industry standard and possess a very high strength-to-weight ratio.  
\*According to ISO 7337-11

**S3**  
S3 aluminum shafts are computer engineered and manufactured with high-grade aluminum. This magnesium aluminum alloy has been strain hardened to confer high strength and good resistance.  
\*According to ISO 7337-11

**S2**  
S2 aluminum shafts utilize the same technical swaging and design features found in the S4 and S3 series and are rated to 45 000 PSI.  
\*According to ISO 7337-11

**SC**  
SCOTT uses Carbon Construction as it's a strong yet lightweight material that never sacrifices performance. Light, stiff, with unmatched performance, Carbon Construction is used in SCOTT skis, poles and boots because there are no shortcuts to building a better product.

**SCOTT S.R.S. - STRAP RELEASE SYSTEM**  
The SCOTT S.R.S. is the next generation of safety technology in ski poles. The S.R.S. allows the strap to release from the grip of the pole in sketchy situations to prevent injury.

- \* Releases quickly while pulling sharply upwards
- \* Integrated system for best wearing comfort
- \* Safety anywhere and anytime

**SCOTT TELESCOPIC**  
SCOTT telescopic poles, with a durable clamp, are designed with the idea of having one pole for everything. Whether you're simply looking for a durable pole that will be handed down from generation to generation, for shorter (and taller) skiers, or you need to shorten them to fit in the back of your pack to access an exposed couloir when freeriding, this is your pole!

## HELMETS

**MIPS (MULTI-DIRECTIONAL IMPACT PROTECTION SYSTEM)**  
Improved protection on angled impacts, reduces the rotational violence transmitted to the brain.

**MIPS INTEGRATED FIT SYSTEM**  
Having a MIPS integrated system allows for improved comfort and fit, this is also enhanced by a 360 fit system. This improves your ability to keep your head comfortable and secure while skiing, as well as ultimately reducing the rotational violence transmitted to the brain.

**360° PURE SOUND**  
On the mountain, safety is paramount, and being able to hear what is happening around you can save your life. This is why we have invested in R&D to develop 360° Pure Sound technology, a specifically-shaped inner piece in our ear pads, surrounded by sound transparent fabric. It not only lets you hear better, but also localize sound more accurately.

**VISOR FIT PADDING**  
To have a perfect fit between visor and nose, we implemented a modular padding into our Blend Plus helmet. For a personal fit, take out the grey patch you find in the liner and try the helmet with visor on with and without, choose what suits you best!

**MAGNETIC VISOR MECHANISM**  
The Blend Plus is featured with a clever Magnetic Visor Mechanism, the visor can be securely positioned in lower and upper positions through the use of magnets to offer maximum freedom of use.

**RECCO TECHNOLOGY**  
The integration of Recco adds an extra layer of safety and if you get into trouble on the mountain, it makes you searchable to rescue professionals.

**CASIDION®**  
Casidion® is a nanotechnology-based impact material used in our Couloir Mountain. This revolutionary material allows us to significantly reduce the weight & delivers an increased level of protection.

**AMPLIFIER**  
The unique aspect of Amplifier is the shape of the visible light transmission curve, optimizing three specific wave lengths: blue, orange and red. These ranges of light are the most important for the human eye to enhance contrast and clarity.

**AMPLIFIER LIGHT SENSITIVE**  
SCOTT Light Sensitive lenses use photochromic technology and get darker or brighter automatically depending on the surrounding light conditions.

**VISOR CHANGE MECHANISM**  
The visor is attached on the helmet by two ropes with a lock. The ropes are here to guide the visor to lower and upper positions. It also prevents the visor from falling off of the helmet. The visor can be changed easily as you would change goggles by unclipping the locks from the shell.

**SMART TEXTILE FABRIC**  
The fabric used for the padding keeps your head cool when you need it, the fabric allows for perspiration to evaporate, meaning the vaporized heat can be carried away and the fibres can be cooled down.

## EYEWEAR

**POLARIZED**  
Polarized lenses filter the light to reduce glare and eyestrain. They block bright reflections from different surfaces, like snow, water, or road surfaces. When glare is reduced you can see your surroundings clearer.

**ADJUSTABLE NOSEPADS**  
The adjustable nose piece allows for truly conforming, individual fit. Just as no two people are alike, neither are their noses. This custom-fit piece offers superior grip and unparalleled comfort.

**HINGE FLEX**  
The innovative hinge flex construction paired with the textured temple tips minimizes pressure points while providing supreme grip.

**LOW PRESSURE TEMPLE**  
The innovative temple tip rubber construction minimizes pressure points while providing supreme grip - all you need to focus on is the ride ahead of you.

**BIO BASED**  
All of our sunglasses' frames are made from 45% bio-based polymers sourced from castor beans, contributing to the reduction of our carbon footprint and dependency on fossil fuels, while maintaining a high level of performance.

**UV PROTECT**  
All SCOTT lenses are optically engineered to screen out 100% of harmful UVA/UVB rays.

**LIGHT SENSITIVE**  
Depending on the intensity of UV and visible light, these lenses are formulated to change from light to dark and back in matter of seconds to provide you with the ideal level of visibility and light protection.

## PROTECTION

**AIRFLOW**  
Level 1 protective plate using an exclusive SCOTT design in collaboration with D3O. Composed of 56% bio-based PU, it is ventilated, lightweight and flexible.

**AIRFLOW PRO**  
Level 2 protective plate using an exclusive SCOTT design in collaboration with D3O. Composed of 56% bio-based PU it is ventilated, lightweight and flexible. It is the most protective plate in our range.

**AIRFLOW FREE**  
Level 1 protective plate using an exclusive SCOTT design in collaboration with D3O. Made to forgotten when riding, it is low profile, extremely flexible and ventilated.

**D3O®**  
D3O® is a unique material that focuses on energy dispersion in critical areas for maximum shock absorption and protection. The functionality of the raw material originates from the synergetic effects of the polymer-based dilatant. Energy is distributed throughout the synthetic elastomeric polymer and the enhanced chemistry continues to disperse the energy throughout the matrix, significantly reducing the effect of impact.

**RE-SOURCE**  
At SCOTT, we believe of doing things the right way and for the right reasons. We are committed to improving the impacts of our products and business practices, preserving the environment for future generations and stimulating positive change in our communities.

## GOGGLES

**AMPLIFIER**  
The unique aspect of Amplifier is the shape of the visible light transmission curve, optimizing three specific wave lengths: blue, orange and red. These ranges of light are the most important for the human eye to enhance contrast and clarity.

**AMPLIFIER PRO**  
The new patent-pending SCOTT AMP Pro lens technology offers you the best contrast ever developed and brings out every detail, even in low light conditions. Thanks to its characteristic natural tint, colours remain true to nature, reducing eye strain and improving visual comfort.

**AMPLIFIER LIGHT SENSITIVE**  
SCOTT Light Sensitive lenses use photochromic technology and get darker or brighter automatically depending on the surrounding light conditions.

**SPHERICAL LENS**  
Spherical lenses are manufactured to mimic the shape of the human eye in order to provide superior vision in all directions. A greater chamber volume also helps to prevent fogging.

**CYLINDRICAL LENS**  
Cylindrical lenses curve from left to right, are flat from top to bottom and are low profile and flexible.

**LCG SYSTEM**  
SCOTT's patent-pending Lens Change System offers quick and effortless lens interchangeability. The mechanical slider on the side of the goggle raises the lens off the frame, meaning the lens can easily be changed without having to touch the surface of the lens or take off your gloves.

**ACS**  
ACS ventilation incorporates lens air intake vents on the goggle lens and frame air outtake vents on the bottom of the goggle.

**NO FOG**  
SCOTT lenses undergo a permanent NoFog™ treatment process to prevent condensation and fogging.

**OTG**  
OTG goggles offer protection from the elements and an optimized fit for people requiring prescription glasses, thanks to a specific and adapted construction.

**FACE FOAM1**  
Soft, single-density face foam delivers a precise fit around facial features while sealing out the elements.

**FACE FOAM2**  
This two-layer, open-celled face foam with fleece has excellent moisture-absorbing and thermal properties, ensuring that you stay warm, dry, and comfortable all day.

**FACE FOAM3**  
This three-layer, open-celled face foam with fleece has excellent moisture-absorbing properties, and offers increased levels of comfort and an improved fit thanks to the extra layer of protective foam.

**NO SWEAT**  
This unique face foam consists of a microfiber layer that is extremely water absorbent. It soaks up moisture fast and avoids sweat getting into your eyes or inside the goggle.

**UV PROTECT**  
All SCOTT lenses are optically engineered to screen out 100% of harmful UVA/UVB rays.

**FIT SYSTEM**  
SCOTT's Goggle Fit System is a mechanical adjustment that creates a custom face and nose fit. Two pivot points located at the bottom of each side of the goggle can be adjusted in several positions allowing the goggle to fit tightly against the rider's face.

**FULLY INTEGRATED LENS CHANGE MECHANISM**  
Minimal product design with seamless integration of lens change mechanism. The magnetic slider lifts the lens off the goggle to offer a the ease of a 1-hand usability. The magnets engage an optimized handling of the lens change.

**AUTOMATIC LENS LOCK SYSTEM**  
The new Lens Lock Automatic securely locks the lens in the goggle - zero risk to lose the lens. Seamless sealing. Well thought positioning of the magnets keep the slider intentionally locked.

**RE-SOURCE**  
At SCOTT, we believe of doing things the right way and for the right reasons. We are committed to improving the impacts of our products and business practices, preserving the environment for future generations and stimulating positive change in our communities.

**RAM AIR**  
RAM Air allows perfect airflow inside the goggle frame to avoid moisture on the lens.

## BACKPACKS & BAGS

**ALPRIDE-E2**  
Fully electronic avalanche airbag system with supercapacitor technology, LCD display and automatic pressure relief valve.

**ALPRIDE E1**  
Fully electronic avalanche airbag system with supercapacitor technology.

**ALPRIDE 2.0**  
Alpride 2.0 is a purely mechanical system, and thanks to its small gas cartridges, it is one of the lightest and most compact airbags on the market.

**CORDURA®**  
CORDURA® fabrics offer enhanced tear and abrasion resistance with a wide variety of apparel styling options. Fabrics look and feel like cotton with durable, long-lasting nylon performance. There is an exceptional strength-to-weight ratio.

**AVALANCHE EQUIPMENT**  
Dedicated avalanche rescue tool compartment to guarantee fast and easy access.

**DYNEEMA®**  
Dyneema® fabrics make products lighter and more comfortable without compromising on strength and durability. Available as composites, denim, knits and wovens, these fabrics are the game-changers for the outdoor, sport and fashion industry.

**DIAGONAL CARRY**  
Diagonal ski fixation system ideal for short steep climbs. The top and bottom loop are connected and use only one fixation point. Open the buckle on the top, pull out the bottom loop, hook in the skis, tighten the bottom loop by pulling the upper webbing loop, close the buckle over the skis and tighten the webbing to secure the skis.

**FRAME CARRY**  
One ski is attached on each side of the backpack for an even weight distribution and better balance. Use a strap on the ski tops to keep the skis together for even better stability.

**SNOWBOARD CARRY**  
Carry system for snowboard & snow shoes.

**COMPRESSION**  
Compression straps which brings the load and weight closer to the back of the pack.

**WINTER HELMET CARRY SYSTEM**  
Net fixation for a winter helmet.

**ICE PICK FIXATION**  
Fixation for ice axes or poles.

**EQUIPMENT FIXATION LOOPS**  
Mounting loops made of durable webbing are versatile and ideal for mounting additional equipment that is easily accessible.

# SEA SKIS

A stylish ski that's smooth as butter? That's just the ticket for an athlete like Parkin Costain, who rides the SEA skis through pillows, pow and playful terrain with his signature flair. But what is it that makes these sticks flow? An effortless pivot and seamless edge transition make navigating any terrain a breeze. A full wood core gives the pop to sail from sidehits to backcountry features. A long tip and tail rocker let the ski go deep and charge hard... and has got your backside on deep landings. For the ultimate days, when your buddies are calling, and you're riding 'til last lift come snow or shine, grab the SEA ski and practice what they preach: Ski Everywhere Anytime!

## WHAT YOU NEED TO KNOW

TITANAL REINFORCEMENT

SKI FREERIDE

Designed with one goal in mind: to live those unforgettable days when you call your boss to say “I’m sick, I can’t go into the office today” and find yourself surrounded by 30 centimetres of fresh powder. Jump bars, shred pillows, trace endless couloirs and immerse yourself in playful forests, all while feeling like you’re floating effortlessly in a dream.

SCOTT PURE PRO 109TI SKI

SCOTT PURE MISSION 98TI SKI

SCOTT PURE MISSION 98TI WOMEN'S SKI

JÉRÉMIE HEITZ

# BORN AND NURTURED IN THE ALPS

The Pure Pro 109Ti is equipped with a progressive titanal layer that harmonizes the flex and adds power transmission when coming out of a turn. At the same time, the ski delivers more stability, enabling you to hold your line while riding steep big-mountain lines. The Pure Pro 109Ti impresses with its light weight and performance, thanks to the dual-power wood core – a mix of paulownia and 4 beech stringers that cover the full length of the ski. The combination of paulownia and beech gives extra resistance when it comes to torsional stiffness. So you can go all in on those high-speed runs.

## INNOVATION

- Pure Freeride Sidecut
- Inspired by Jérémie
- Provides stability and maneuverability in any conditions

## TECHNOLOGY

- Power Titanal Layer
- Paulownia & Beech Woodcore
- Reduced weight and increased torsional stiffness

## DESIGN

- Design collaboration with Jérémie Heitz
- Pure design language

# EXPLORAIR 92 LT SKI

Introducing our lightest touring ski yet - the Explorair 92 LT! Breaking the mold of traditional touring ski design, the Explorair 92 LT is designed for everyone ready to enjoy the experience of touring and exploring in the mountains. Offering great performance on the uphill and focusing on fun on the way down, the Explorair 92 LT cruises through variable snow, while keeping a secure grip when things get steep.

Crafted from the lightest materials available – paulownia and carbon – the ski weighs only 1150g (172cm) making climbing a breeze. With titanal reinforcement underfoot, the ski is geared for performance, with a hybrid CAP and sidewall construction holding strong in all terrain. The Explorair 92 LT is equipped with skin notches to keep your skins secure and make transitions easy.

Embrace the joy of skiing with this innovative, lightweight touring ski – your ticket to speed on the uphill, and pure fun on the way back down.

**TOUR LT**  
Sandwich construction for our lightest touring skis. We use a full-length light Paulownia wood core and specific base, edges and topsheet to be as light as possible. The mix of fiberglass and carbon stringers above the wood core ensure the grip and torsional stiffness you need in icy conditions while keeping the ski lively. Light for long ascents, plenty of control and fun on the way down, now your set for your longest missions in the backcountry.

**SKI TOURING**

It's about choosing your own path, having no expectations other than your own, whether it's to have fun or to perform well, alone or in good company. Seek the ultimate adventure and experience the freedom to explore with our lightweight, high-performance touring skis.

**ROCKER TYPE:** Freeride Tip and Tail Rocker M  
**CONSTRUCTION:** Sandwich Tour Eco

- FEATURES:**
- Poplar Wood Core
  - Flax Fibers
  - Fiberglass
  - Full length Sidewall
  - Titanal Reinforcement
- ECO FEATURES:**
- 100% certified poplar wood core
  - Natural flax fiber reinforcements
  - Partly recycled base
  - Partly recycled edges
  - Partly biobased topsheet
  - Partly recycled Titanal reinforcements
  - More than 50% eco-content by weight
  - Re-source by SCOTT product

SKI SKINS

1. 65% MOHAIR - 35% NYLON MIX

Mohair from the fur of the mountain goat offers good sliding capability on skins. Nylon has more grip and is more water-repellent and durable. The mixture of Mohair / Nylon with medium pile combines the advantages of both materials in an optimal way and guarantees the best climbing and sliding capabilities in all terrain.

2. FIBER SEAL TECHNOLOGY

The newly developed support material is waterproof to prevent balling of snow. It's shape and stability also make the strap easier to manipulate.

3. SMART HOT-MELT ADHESION

The new dimensionally stable adhesive with reduced peel-off values guarantees easy handling.

SCOTT SKI TECHNOLOGY

SCOTT builds skis the modern way, because skiers use the terrain as their playground, sliding, cutting and carving turns all over the mountain. There are no rules when it comes to skiing style, and there are no shortcuts in developing next-level technology.

3Dimension Sidecut – The new 3Dimensional Touring Sidecut is a revolutionary design for a better touring tuning that combines a tip and tail radius with either a central flat line or a small amount of sidecut under foot. The tip and tail radii allow for easy turn initiation while the flat line or a larger radius provides stability, power and precise edge hold. In addition to the new

3Dimension Touring sidecut our established 3Dimension Sidecut increases the skiability and performance in our freeride skis. In addition to the new 3Dimension Touring sidecut our established 3Dimension Sidecut increases the skiability and performance in our freeride skis.

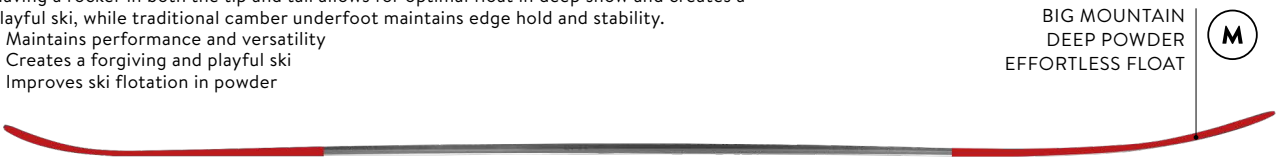

3DT TECHNOLOGY

ROCKER TECHNOLOGY

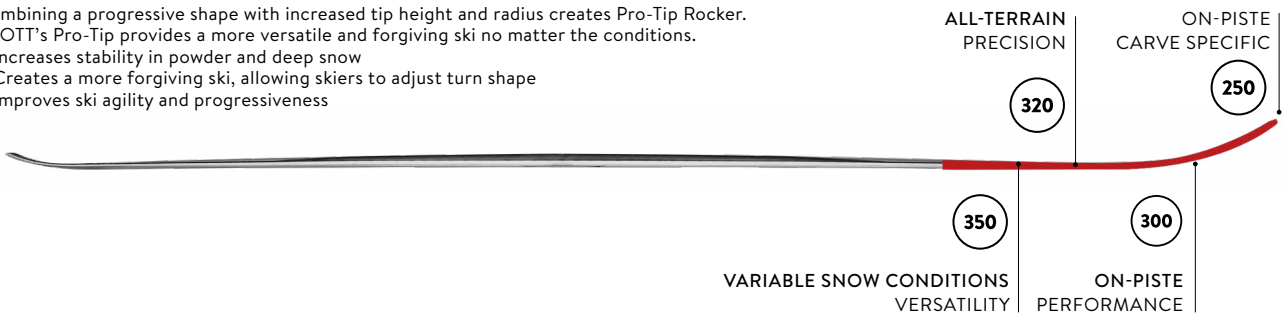

TWIN-TIP ROCKER

Having a rocker in both the tip and tail allows for optimal float in deep snow and creates a playful ski, while traditional camber underfoot maintains edge hold and stability.  
+ Maintains performance and versatility  
+ Creates a forgiving and playful ski  
+ Improves ski flotation in powder

PRO-TIP ROCKER

Combining a progressive shape with increased tip height and radius creates Pro-Tip Rocker. SCOTT's Pro-Tip provides a more versatile and forgiving ski no matter the conditions.  
+ Increases stability in powder and deep snow  
+ Creates a more forgiving ski, allowing skiers to adjust turn shape  
+ Improves ski agility and progressiveness

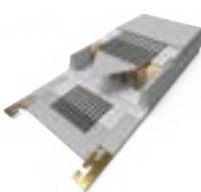

SCOTT SKI CONSTRUCTION

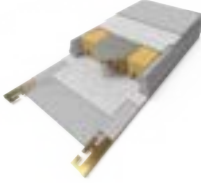

SCOTT uses carbon fiber in the construction process because it’s a strong yet lightweight material that never sacrifices performance. Light, stiff and with unrivalled performance, carbon construction is used in SCOTT skis, poles and boots because there are no shortcuts when it comes to building better products.

To achieve the best performance possible, the core construction of a ski is pivotal. That’s why the composition of every SCOTT ski is carefully engineered and thoroughly tested in order to provide skiers with the most innovative and weight-efficient skis.

SANDWICH FREERIDE

Sandwich construction dedicated to our high end freeride skis. We use a combination of beech and poplar to create the best wood core to ensure performance and forgiveness. Loaded with carbon stringer for the rebound, the dampness and control are provided by the Titanal inlays under the foot. The lightness was crucial to us during the development, we switch traditional materials for high end, so you get the same performance in a lighter package. It will float better in powder, and you can mount it with a free touring binding.

SANDWICH POWDER

Introducing our new SEA freeride skis featuring a sandwich construction. We used a complete poplar wood core from tip to tail to guarantee both performance and lightness. Dampening and control are achieved through Titanal inlays beneath the foot, combined with full-length sidewalls, allowing you to enjoy any conditions. Whether you’re tearing through chopped snow, hitting the resort jumps, or cruising through powdery fields, this is the structure that will match your needs.

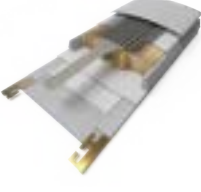

SANDWICH ALL MOUNTAIN

Sandwich construction dedicated to get the best grip while being super lively. We use a poplar wood core milled in an elliptic shape to ensure the best edge to edge performance. This ski is loaded with carbon in two different layers: carbon stringers for the rebound and 45-degree fibers to control the torsion. Titanal inlays under foot ensure the dampness you need to rip down any inbound terrain. By switching traditional materials for high end, you get the same performance in a lighter package, and it will float better in powder.

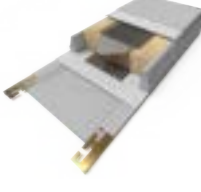

SANDWICH PISTE

Sandwich construction dedicated to get the best piste performance. We use a poplar wood core milled in an elliptic shape to ensure the best edge to edge performance. This ski is loaded with 45-degree carbon fibers to control the torsion. Titanal inlays under and above the wood core take care of the power transfer while carving down the slopes. As with all our constructions we focus on lightweight, so you can have fun longer!

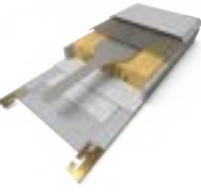

SANDWICH TOUR

Sandwich construction for our touring skis. We use a full-length light Paulownia wood core with Poplar reinforcement. Layers of fiber Titanal underfoot are ensuring the grip and torsional stiffness you need in icy conditions. While full length carbon fiber stringers make the ski lively. This is the best construction for downhill performance in our ski touring range. Light to enjoy the uphill. Full of power and grip on the way down. The only benefit you don’t get with our top of the range construction is the reward beer at the end of the day.

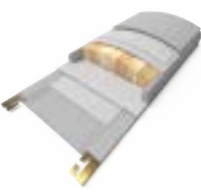

SANDWICH TOUR LITE

Sandwich construction for our lightest touring skis. We use a full-length light Paulownia wood core and specific base, edges and topsheet to be as light as possible. The mix of fiberglass and carbon stringers above the wood core ensure the grip and torsional stiffness you need in icy conditions while keeping the ski lively. Light for long ascents, plenty of control and fun on the way down, now your set for your longest missions in the backcountry.

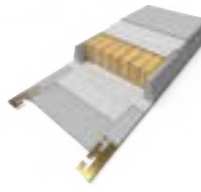

SANDWICH TOUR ECO

Sandwich construction for our Re-source skis, essentially made from recycled materials. We use a full-length light certified poplar wood core milled with air channels (air-tec). Flax fibers reinforcement are used in the usual place of synthetic fibers. On top of being natural and eco-responsible they damped the ski. The eco-sourced Titanal layer under foot ensure the torsional stability you need to enjoy any conditions. Awarded by ISPO, this is the most sustainable construction in our range.

SANDWICH LITE

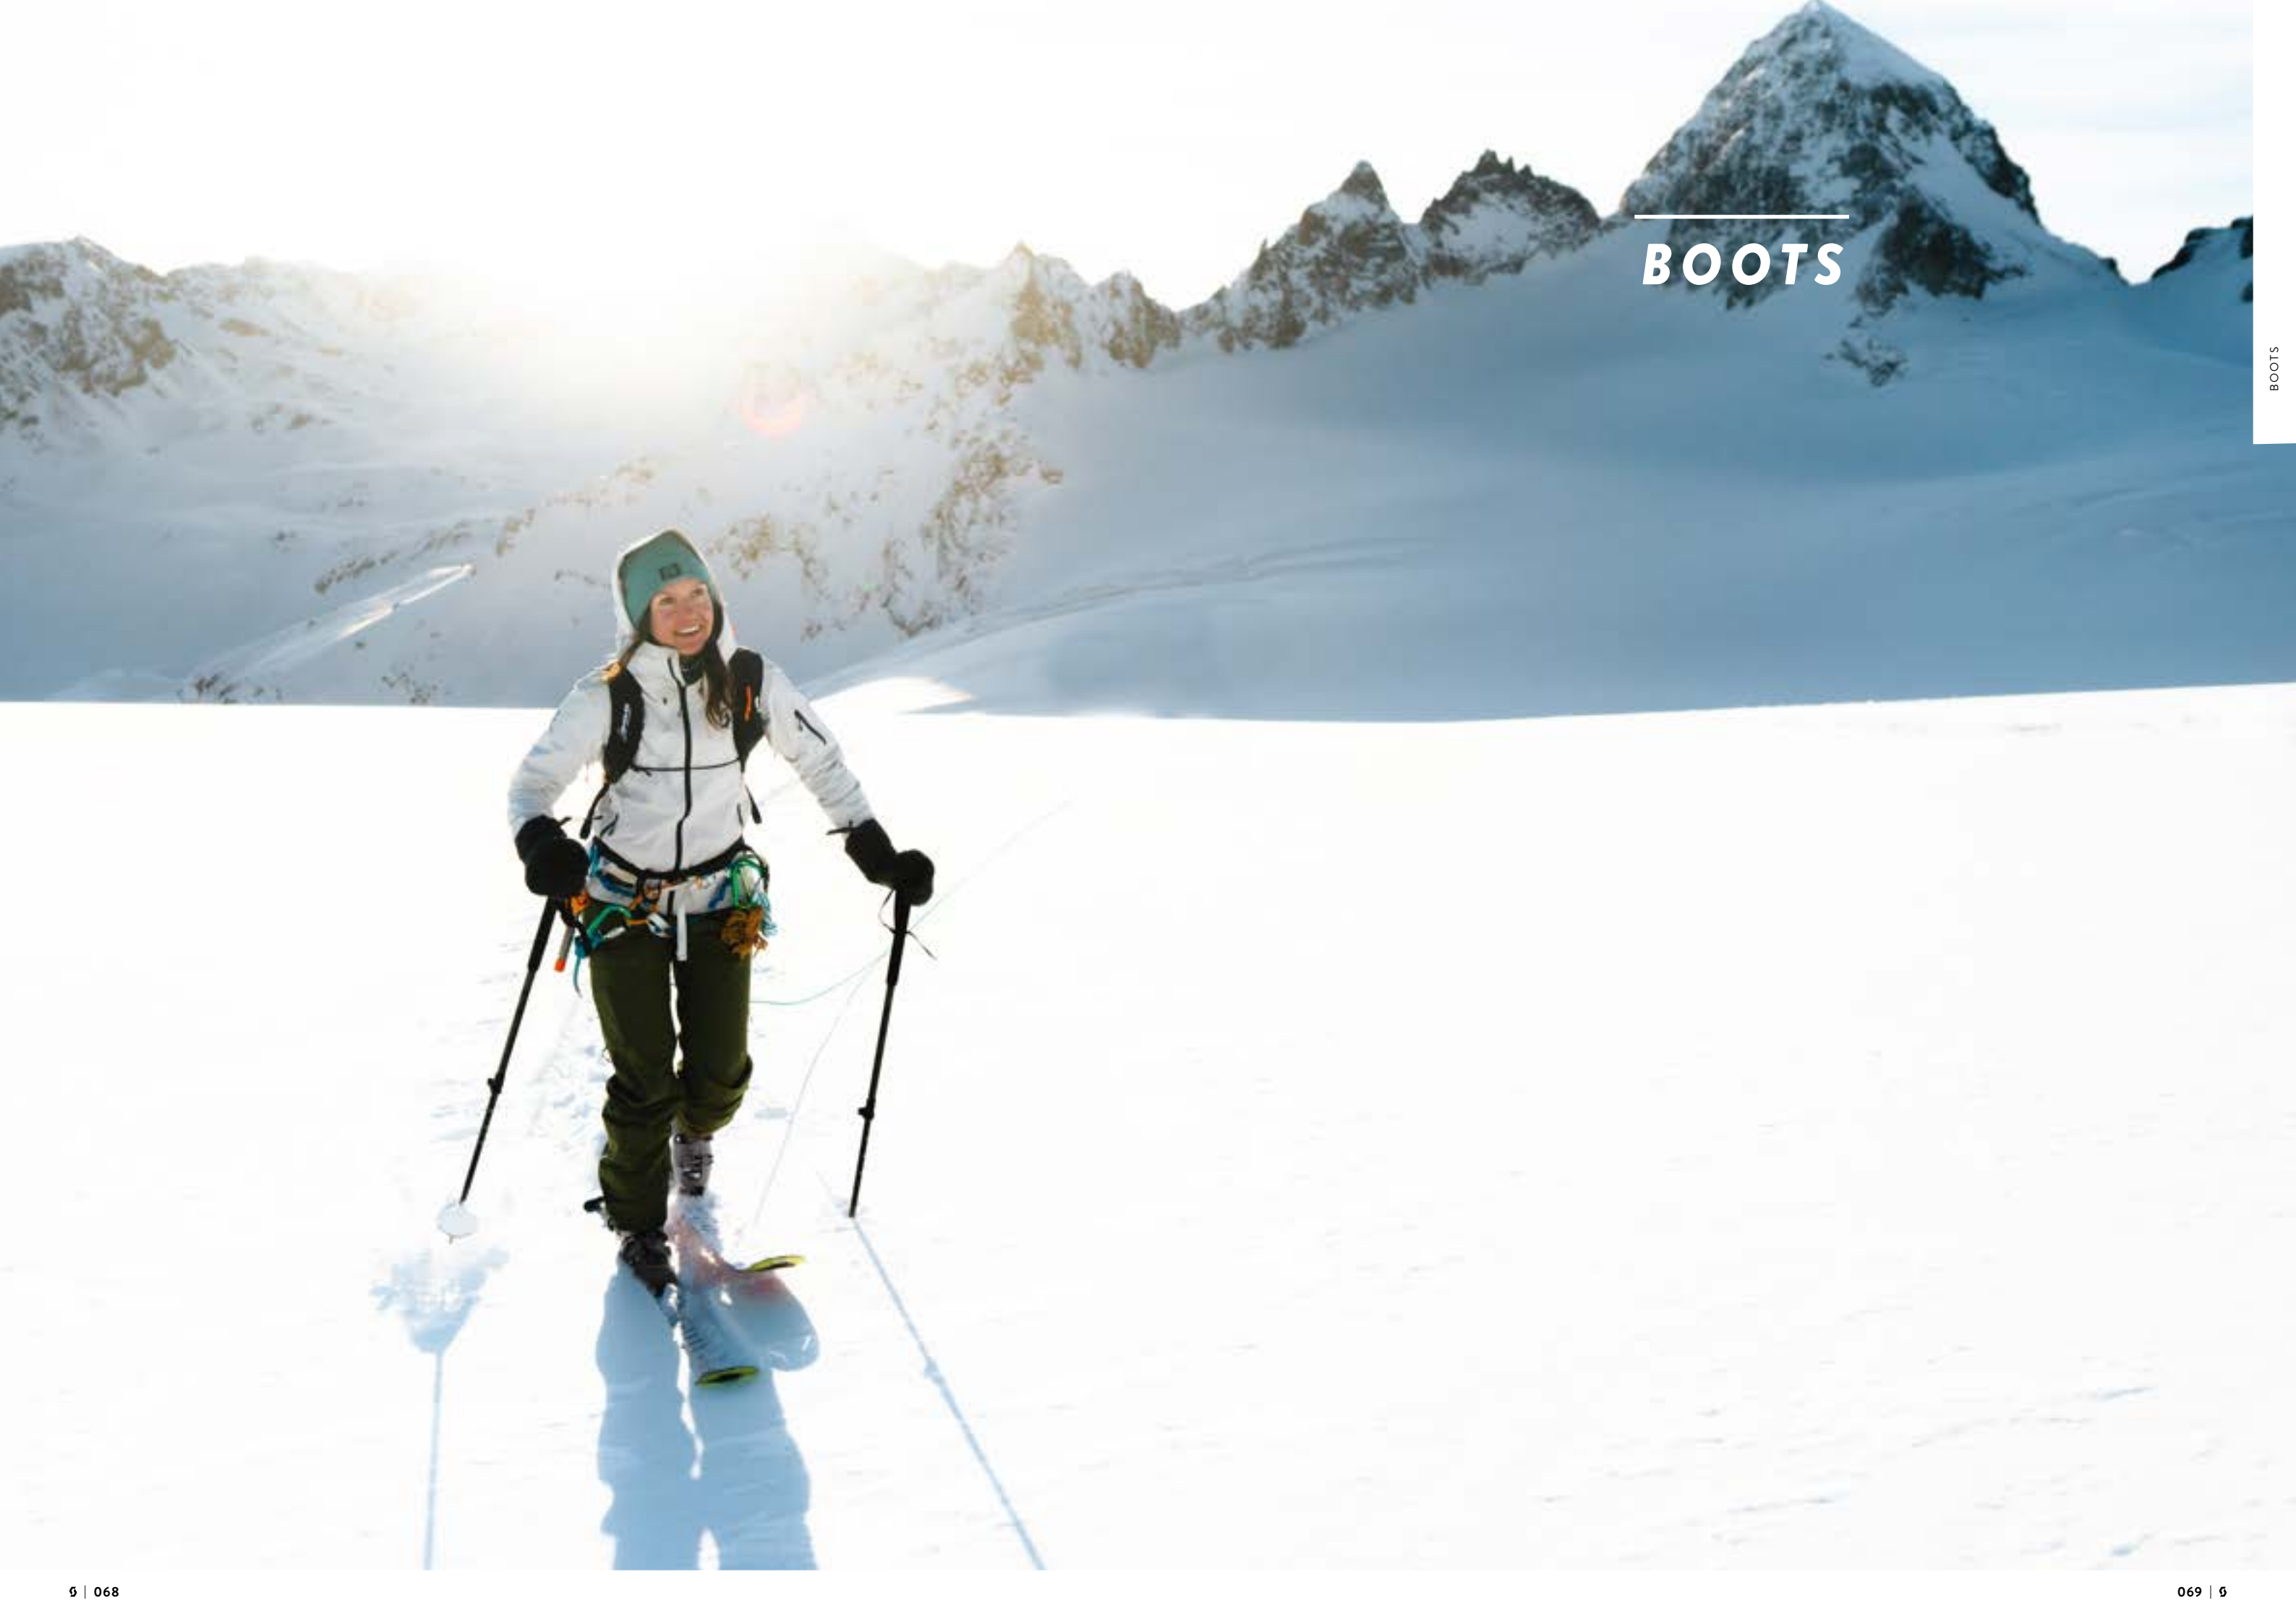

Sandwich Lite construction for our accessible touring skis. We use a full-length light poplar wood core for lightness. Layers of fiber glass underfoot are ensuring the grip and torsional stiffness you need in icy conditions. While full length fiberglass layer makes the ski lively. We focus on creating a forgiving structure, suitable for any condition and performant when you want to. It’s the lightest ski construction, without carbon and you’ll enjoy it every day of the season.

SANDWICH

Sandwich construction for our accessible skis. We use a full-length light poplar wood core for performance and control. Layers of reinforcement underfoot are ensuring the grip and torsional stiffness you need in icy conditions. While full length fiberglass layer makes the ski lively. We focus on creating a fun structure, suitable for any condition and performant when you want to. It’s the perfect tool to perform and get better every day.

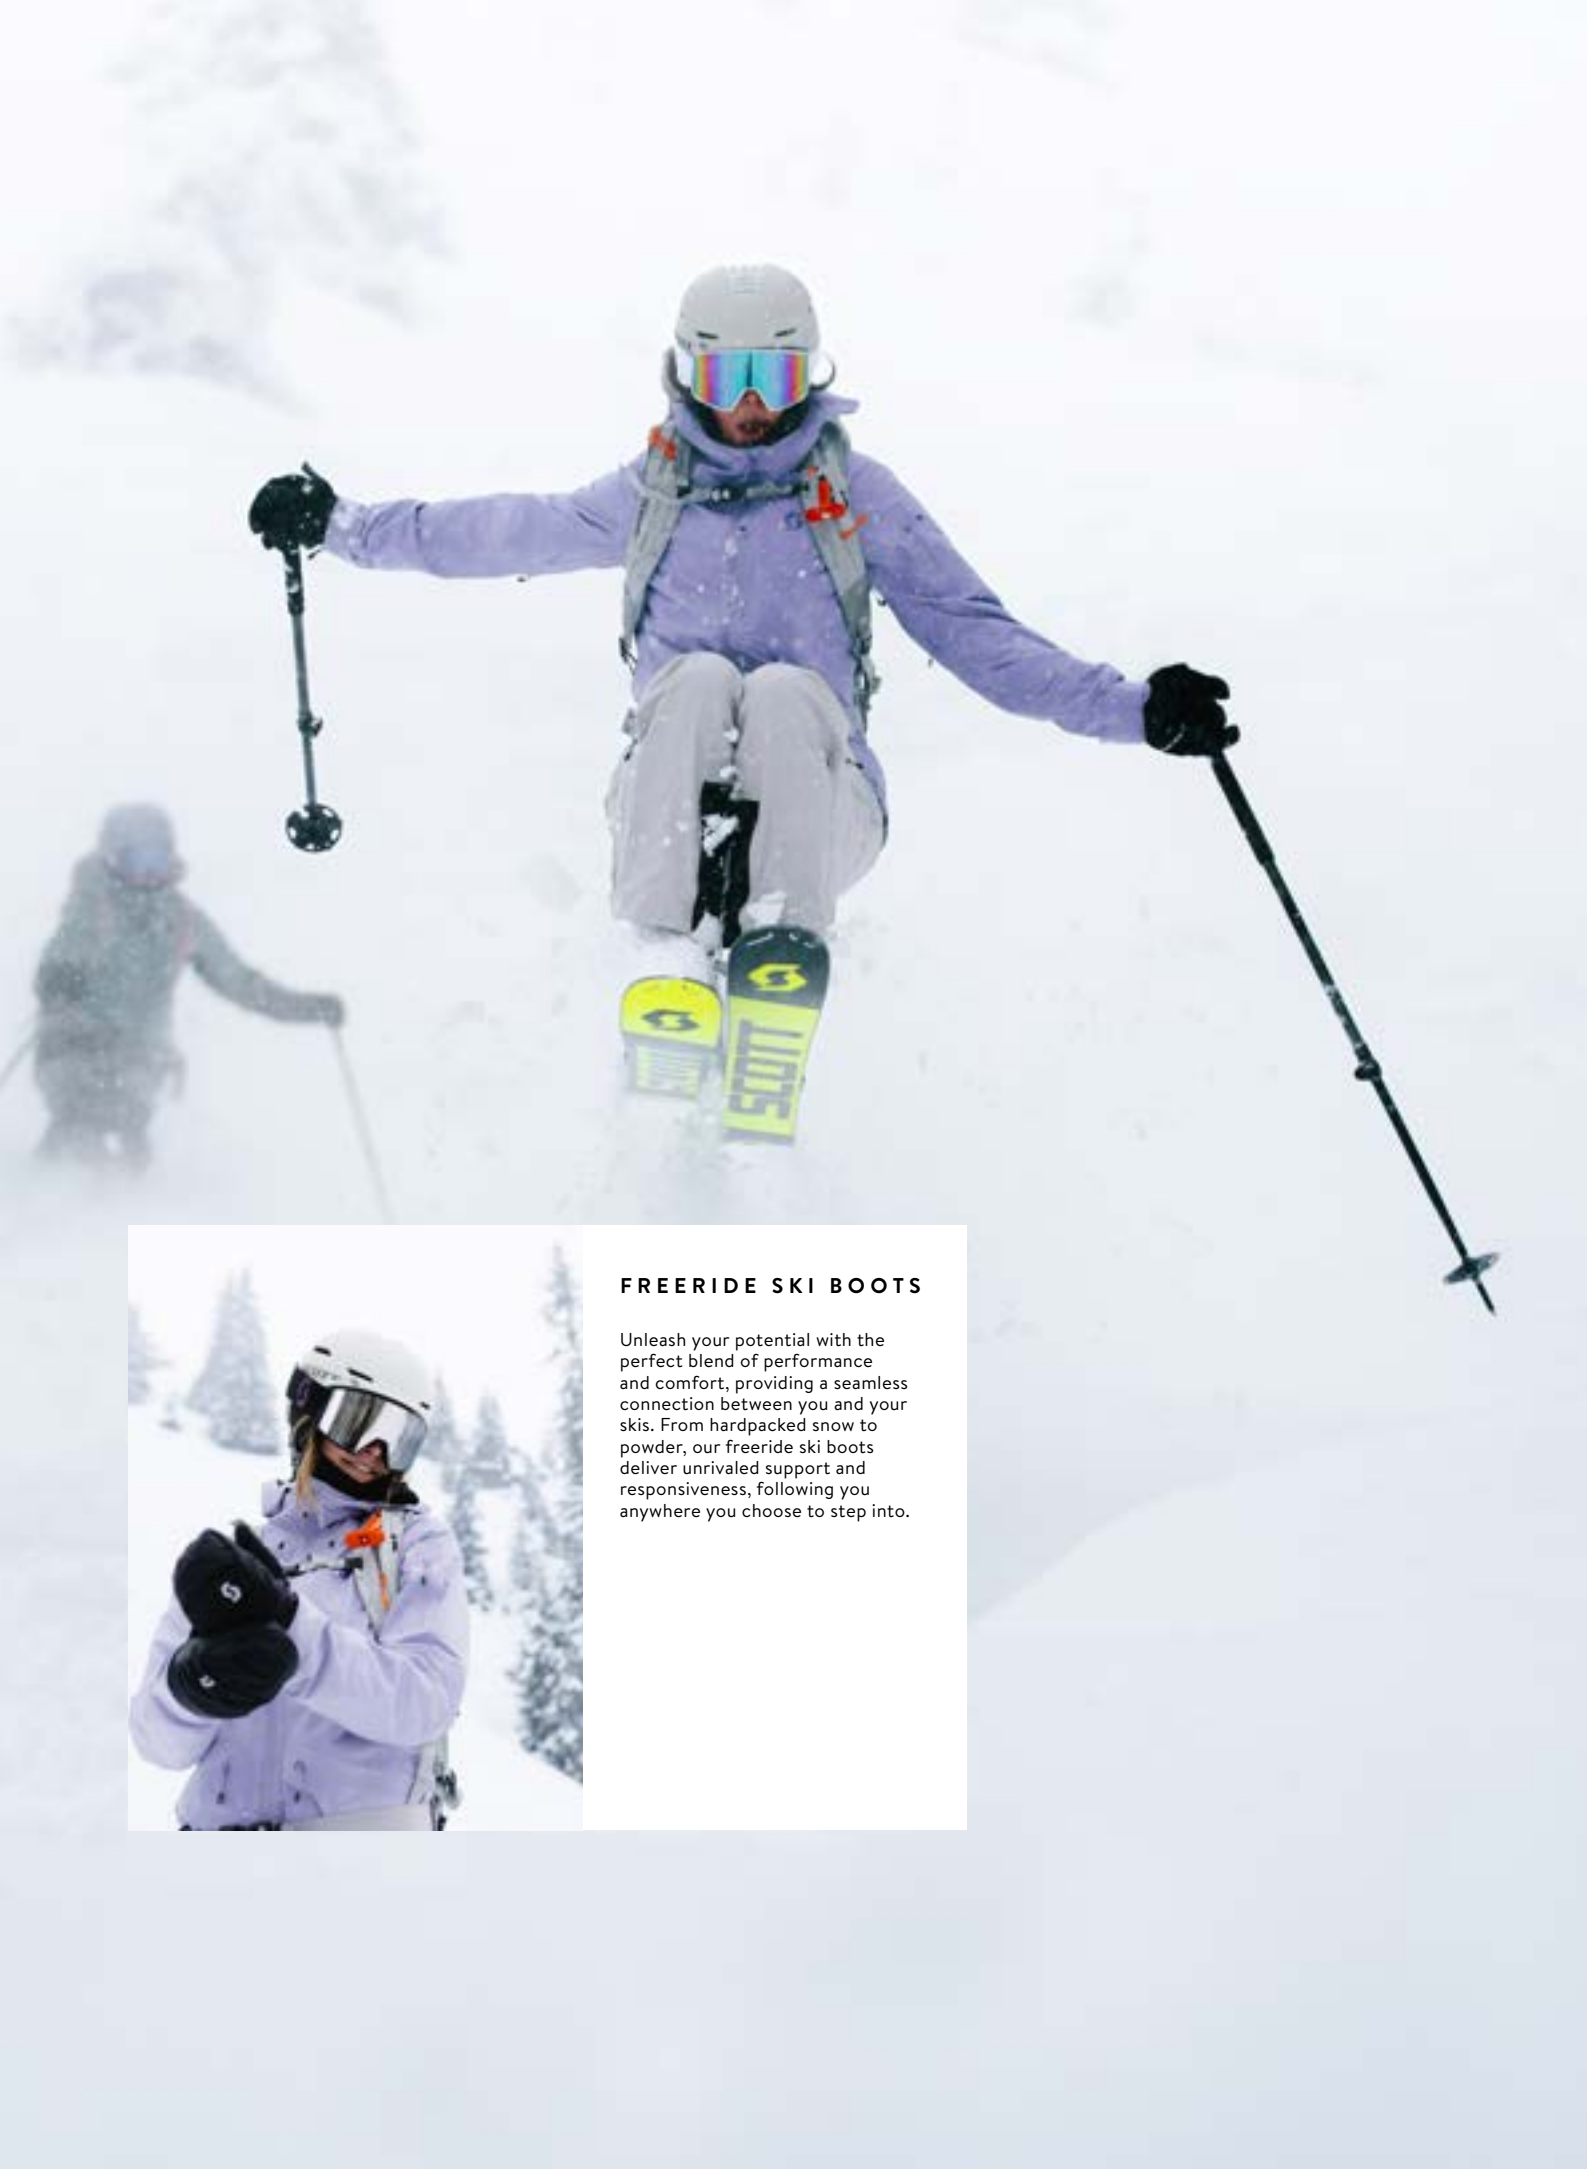

# BOOTS

BOOTS

**FREERIDE SKI BOOTS**

Unleash your potential with the perfect blend of performance and comfort, providing a seamless connection between you and your skis. From hardpacked snow to powder, our freeride ski boots deliver unrivaled support and responsiveness, following you anywhere you choose to step into.

**SCOTT HINT 130 GW BOOT**

# HINT 130 GW SKI BOOT

Conquer the backcountry with the new SCOTT Hint 130 GW. This GripWalk® compatible free-ride ski boot takes its inspiration from the best performing alpine boots thanks to its durable PU materials, SCOTT pre-shaped booster, integral thermo liner, 4 buckles and precise 99 mm last. It will be your ultimate gateway to both limitless inbound and outbound skiing. With uphill features such as the integrated ski walk mechanism, Dynafit® tech inserts and grippy rubber soles, these are the perfect freeride boots for runs requiring some walking. Unleash your power and push the limits further!

## WHAT YOU NEED TO KNOW

TOURING SKI BOOTS

Embark on your backcountry adventures with confidence in SCOTT ski touring boots. Designed for the ultimate touring experience, these boots offer: Lightweight agility, unmatched comfort and a precise fit. Your access to the freedom to explore starts here!

# FREE 18 SKI POLE

Introducing the SCOTT Pole Free 18, a Freeride and Touring pole - Made out of our best alloy while still being light. Adaptability is at your fingertips with the easily interchangeable basket system, allowing you to tailor your poles for various conditions. From deep powder to hard-packed snow, you'll always be prepared. Take on steep faces with confidence, as our poles feature an extended grip, perfectly compensating for the steepness of the terrain. You'll experience unmatched stability and control, ensuring your safety in every turn... But don't just take our word for it - our Free 18 Poles have earned the admiration of ski patrols from Chamonix. Trusted by those who know the mountains best, these poles have proven their worth in the most demanding environments. High quality, stylish and affordable they will be your ultimate one-pole quiver!

STRAP

SCOTT S.R.S. – STRAP RELEASE SYSTEM

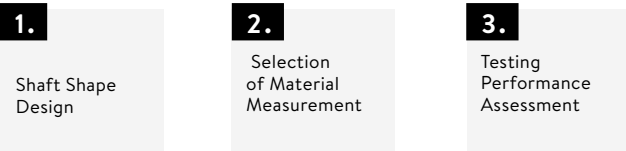

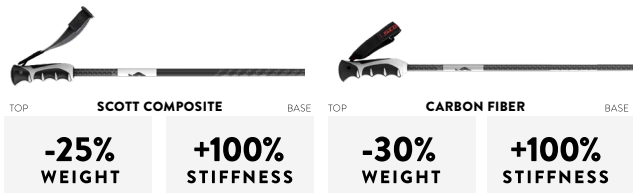

The SCOTT S.R.S. is the next generation of safety technology in ski poles. The S.R.S. allows the strap to release from the grip of the pole in sketchy situations to prevent injury.

- + Releases quickly while pulling sharply upwards
- + Integrated system for best wearing comfort
- + Safety anywhere and anytime

SHAFT

SCOTT Shaft Technology was created when we built the first aluminum pole back in 1958. For over 60 years SCOTT has gone beyond the industry standard to introduce carbon fiber and aluminum systems into our ski poles to make them the best in the world.

ALUMINUM TECHNOLOGY

ELECTROSTATIC PAINT PROCESS

SCOTT aluminum ski poles undergo an electrostatic paint process, delivering a clean, contemporary, highly durable finish.

SWAGED SHAFTS

SCOTT aluminum ski pole shafts are engineered with an exclusive “swage”, giving the pole a dual-taper design. Swaging is a process that utilizes a series of dies to reduce the outside diameter (creating the taper) and to increase wall thickness (adding strength). The taper results in an improved aerodynamic profile, lighter swing weight, and increased strength.

7075 ALUMINIUM

SCOTT aluminum ski poles undergo an electrostatic paint process, delivering a clean, contemporary, highly durable finish. They are constructed with the strongest aircraft-grade aluminum-zinc alloy commercially available, which has been heat treated and aged in order to confer its excellent properties. S4 aluminum poles are twice as strong as the industry standard and possess a very high strength-to-weight ratio.

ALUMINIUM 5083 AND BI MATERIAL GRIP

S3 aluminum shafts are computer engineered and manufactured with high-grade aluminum. This magnesium aluminum alloy has been strain hardened to confer high strength and good resistance.

ALUMINIUM 5083 AND MONO MATERIAL GRIP

S2 aluminum shafts utilize the same technical swaging and design features found in the S4 and S3 series. These poles have a great quality-to-price ratio, with good resistance and strength.

CARBON IN SCOTT POLES

CARBON FIBERS IN SCOTT WINTERSPORTS

SCOTT uses Carbon Construction as carbon is a strong yet lightweight material that never sacrifices performance. Light, stiff and with unmatched performance, Carbon Construction is used in SCOTT skis, poles and boots because there are no shortcuts to building a better product.

30% CARBON FIBER

Pro Taper poles integrate a carbon matrix design for a good balance between carbon fiber’s high strength and glass fiber’s flexibility and durability. The Pro Taper includes 70% glass fiber for higher flexibility while staying lightweight and strong.

100% GLASS FIBER

The filament-wound glass fiber poles possess high strength and great flexibility for extreme durability. They will withstand any beating that a skier throws their way.

100% CARBON FIBER

Carbon fiber, with its minimal weight and significant strength, processed using a filament winding technique, is an ideal material for ski pole shafts. Carbon fiber reduces vibration and absorbs shock while improving feel and providing the best swing weight.

ERGONOMICALLY ENGINEERED GRIPS & STRAPS

NOTCH

The Notch Strike Grip has been ergonomically engineered using soft thermoplastic rubber and polypropylene. The lightweight, streamlined profile facilitates necessary wrist articulation.

SLASH

Ergonomic, comfortable and modern, the slash grip is developed by our engineers.

P-LITE

The P-Lite Grip is engineered to blend ergonomic comfort with durability.

EG FOAM

The EG Foam Grip offers a lightweight feel and great multi season usage with bare hands.

FOAM SLEEVE M

The foam sleeve allows for a grip underneath the grip. It is present on the telescopic poles.

FOAM SLEEVE L

The foam sleeve allows for a grip underneath the grip. It is present on the telescopic poles.

NOTCH JUNIOR

The Junior Notch Grip is our Notch Strike Grip for smaller hands.

P-LITE JUNIOR

Put down your video games, grab onto the Grip and go skiing. SCOTT’s ergonomically engineered Grip is the answer for smaller hands.

NOTCH 2.0

The newest Notch 2.0 grip is a more modern version of the Notch grip with a new design while keeping the same materials and volume. This new grip combines high performance and modern design.

FOAM CORK

The Foam Cork grip is a bi-component grip with foam over a large part of the grip to offer great comfort.

FX15X25

The FX15x25 is an adjustable strap without the SCOTT logo.

SRS MOUNTAIN

The SRS Mountain Strap is equipped with the SRS safety system developed by SCOTT. It offers a lightweight and comfortable feel, using high quality materials.

FX 24 MEN

The FX24 Man Strap features an increased strap width on the back of the hand for additional support. The injection-molded nylon buckle exceeds a tensile strength of 800 psi.

FX 24 WOMEN

The FX24 Woman Strap features an increased strap width on the back of the hand for additional support. The injection-molded nylon buckle exceeds a tensile strength of 800 psi.

SRS FX

The SRS FX Strap is equipped with the SRS safety system developed by SCOTT. It is made of durable materials and is adjustable with a plastic buckle.

JUNIOR ADJUSTABLE

The length and shape of the Junior Adjustable Strap is engineered to fit children’s hands.

FX24 REGULAR

The FX24 Strap guarantees best wearing comfort.

TOURING

The Touring strap features an increased strap width on the back of the hand for additional support. Both on the way up and on the way down it offers a lightweight and comfortable feel.

RE-ENTRY

The Re-Entry strap has a buckle for easy adjustment of the strap length.

AERODYNAMICALLY ENGINEERED POLE BASKETS

**POWDER PRO (85 MM)**  
The Powder Basket is designed for powder performance, excelling in traversing situations. The basket is a solid in diameter and has strategic holes to maintain a swing weight that is comfortable for everyday use.

**ALL MOUNTAIN (60 MM)**  
The All Mountain (60 mm) Basket blends high-performance and design. The All Mountain basket is 60 mm in diameter.

**ALL MOUNTAIN PRO (70 MM)**  
The All Mountain Pro (70 mm) Basket is the basket developed by our engineers. The All Mountain Pro basket, blends durability and design, is 70 mm in diameter.

**POWDER (85 MM)**  
The Powder (85 mm) basket is ideal for day skiing in fresh snow .

**ALPINE PRO (55 MM)**  
The newest Alpine pro (55 mm) basket has been developed by our engineers for our piste poles. It combines performance with an excellent swing weight and a modern design.

**RUNNING (35 MM)**  
The Running (35 mm) Basket blends lightness and durability for your mountain outings in summer. The basket features a 3,5cm disc.

**TOUR PRO (90 MM)**  
The (90 mm) Basket is designed for powder performance, excelling in traversing situations. The basket is a solid 90 mm in diameter. It blends high-performance and design for all situations. You will find it on our touring poles.

**ALPINE (55 MM)**  
The Alpine (55 mm) basket is ideal on the slopes.

**JUNIOR CLIP (50 MM)**  
The Junior Clip (50 mm) Basket is used on the junior poles. The basket is 5 cm in diameter.

ENGINEERED POLE TIPS

**CARBIDE**  
Carbide Tip is a compound containing equal parts of tungsten and carbon and is approximately three times stiffer than steel. This high-performance tip enhances traction on ice and guarantees better durability.

**STEEL ICE**  
The Ice Tip is diamond shaped for unbeatable hold in extreme conditions.

**PA SUPPORT WINTER**  
The PA Support Winter is designed to strengthen the tip section of composite poles and is manufactured from polyamide, with an axe tip.

**PA SUPPORT SUMMER**  
The PA Support Summer is designed to strengthen the tip section of composite poles and is manufactured from polyamide, with an axe tip.

**STEEL CONE**  
The Steel Cone Tip is used on the Junior poles.

# HELMETS

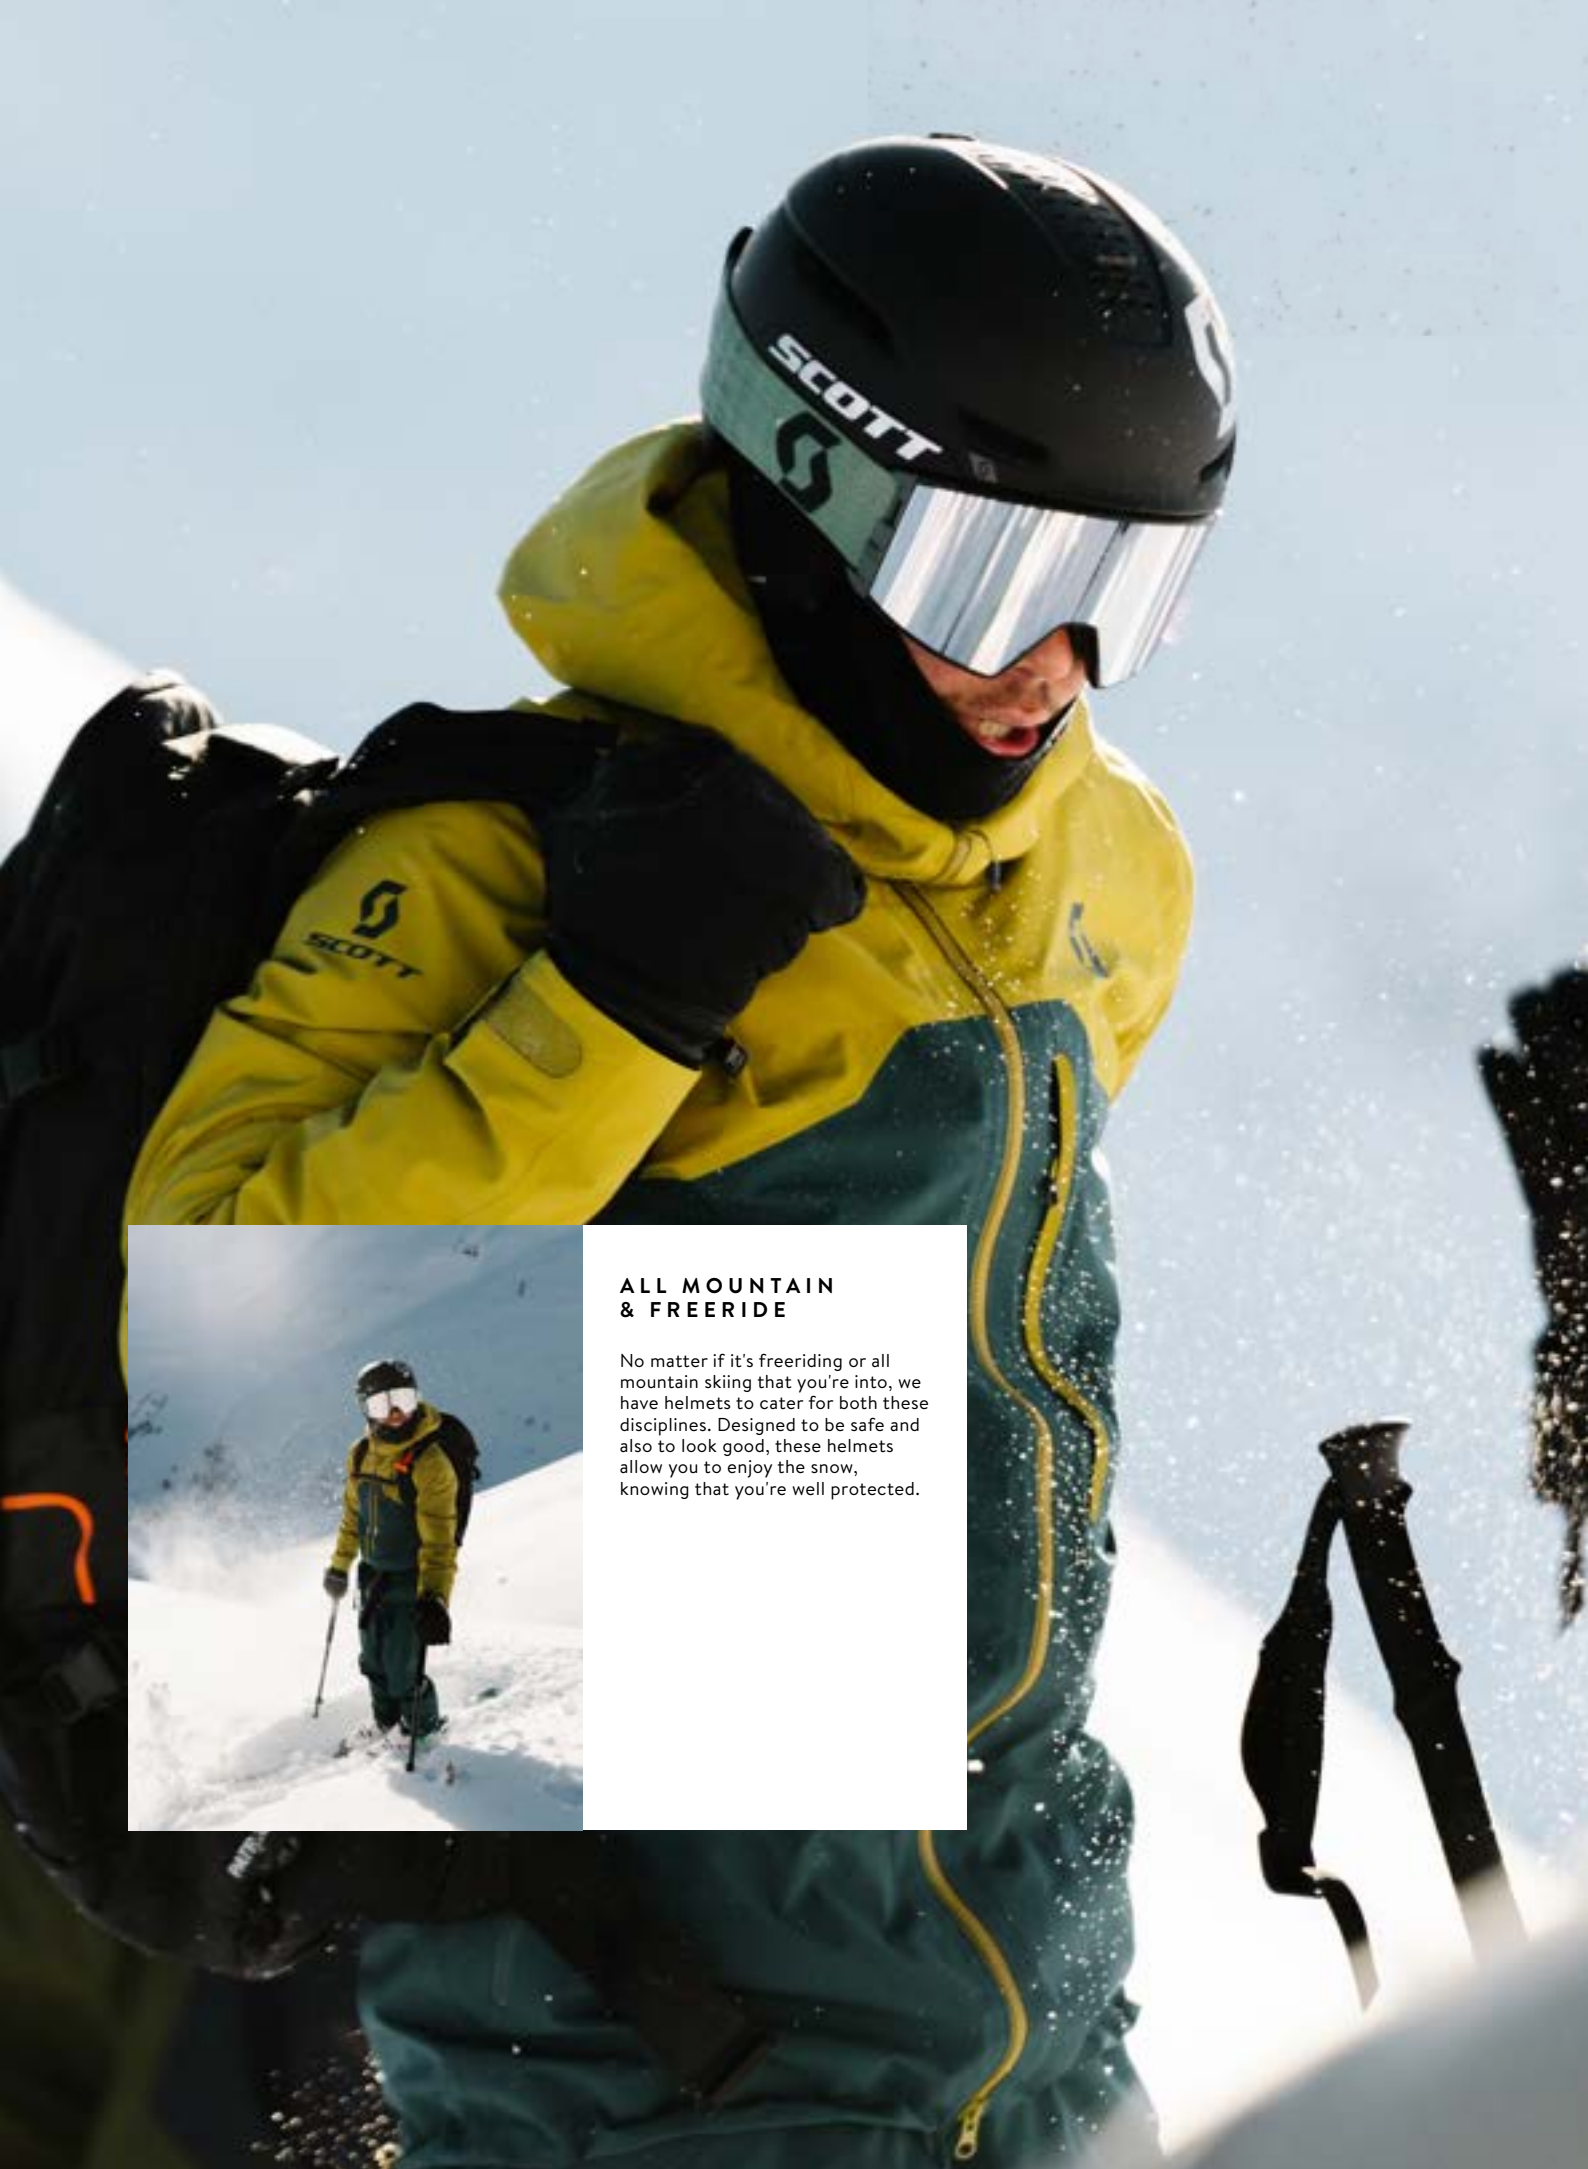

# FLOW PLUS PRO

The Flow Plus Pro is a freeride helmet with features galore. No matter how much mountain shredding you do, your head will stay at an optimal temperature, thanks to the integration of thermo-regulating material. This is reinforced through the ability to adjust the ventilation to your liking, so that your head stays neither too hot, nor too cold. You can make the most of your days in the mountains, knowing you're safe and well-protected with this helmet, through the inclusion of Recco and a MIPS integrated fit system.

## WHAT YOU NEED TO KNOW

ALL MOUNTAIN  
& FREERIDE

No matter if it's freeriding or all mountain skiing that you're into, we have helmets to cater for both these disciplines. Designed to be safe and also to look good, these helmets allow you to enjoy the snow, knowing that you're well protected.

SCOTT FLOW PLUS PRO HELMET

419987

**RANGE OF USE:** All Mountain, Freeride  
**CONSTRUCTION:** PC In-mold with EPS liner & PC bottom wrap  
**SIZE:** S, M, L

- FEATURES:**
- RECCO® Technology
  - MIPS® Brain Protection System featuring seamless integration with Fit system
  - Active Venting System
  - 360° Pure Sound Technology
  - Smart Textile fabric
  - Magnetic buckle
- ECO-FEATURES:**
- More than 42% Eco-content by weight
  - Recycled EPS liner
  - 98% Recycled PC
- EXTRA:**
- Helmet pouch

SCOTT BLEND PLUS LS HELMET

403201

- RANGE OF USE:** All Mountain
- CONSTRUCTION:** PC In-mold with EPS liner, PC/ABS bottom shell
- FIT SYSTEM:** WRAS 2 Fit System
- SIZE:** S, M, L
- FEATURES:**
- Magnetic Visor Mechanism
  - Over the glasses compatible
  - Active Venting System
  - MIPS® Brain Protection System
  - 360° Pure Sound Technology
  - Visor Change System
  - Magnetic buckle
- LENS TECHNOLOGIES:**
- Cylindrical SCOTT OptiView lens
  - SCOTT Amplifier Lens Technology
  - SCOTT Light Sensitive lens (CAT.S1 to S3)

SCOTT TRACK HELMET + FACTOR PRO GOGGLE COMBO

283741

white

**UNIQUE PACKAGES - ATTRACTIVE PRICING**  
We have created unique helmet/goggle combos that will retail at a significantly reduced price. These combos are each offered as a package deal, with a dedicated article number, that gets shipped as a unit, offering end-consumers guaranteed style at a reduced price point.

TRACK HELMET

The SCOTT Track offers great protection and comfort for the ski resort enthusiast. This helmet demonstrates that design and safety don't always come at the highest price.

**RANGE OF USE:** All Mountain, Freeride  
**CONSTRUCTION:** PC In-mold with EPS liner  
**FIT SYSTEM:** J-RAS

**SIZE:** S, M, L

- FEATURES:**
- 360° Pure Sound Technology
  - Passive Venting System

FACTOR COMBO GOGGLE

The SCOTT Factor Combo is the younger sibling of the popular Shield goggle. With a design specifically catered to fit smaller faces, it still offers maximum field of vision thanks to its cylindrical lens construction. The Factor Combo goggle also features a single-layer face foam and a 40 mm strap for unmatched style at a friendly price.

**FIT:** Small to Medium

- TECHNOLOGIES:**
- Single-layer molded face foam
  - No-slip silicone strap

LENS TECHNOLOGIES:

- 100% UV Protection
- Cylindrical Lens
- NoFog™ Anti-Fog lens treatment
- SCOTT Amplifier Lens Technology
- SCOTT Enhancer lens (CAT.S2)

### TOURING

When heading out touring, every gram counts. That's why we've designed touring helmets that not only serve their purpose of keeping you well protected, but have also been developed to be as lightweight as possible.

## SCOTT COULOIR MOUNTAIN HELMET

400278

white/black

**RANGE OF USE:** Mountaineering, Touring  
**CONSTRUCTION:** PC In-mold with EPS liner & PC bottom wrap  
**FIT SYSTEM:** Halo 270  
**APPROX. WEIGHT:** 350 g  
**SIZE:** S, M, L

- FEATURES:**
- Dual standard (ski and mountaineering)
  - Casidion insert for more protection
  - Lightweight construction
  - Performance touring padding that can be used together with the included headband
  - Passive Venting System
  - Headlamp Fixation

## SCOTT COULOIR TOUR

400279

raw black

**RANGE OF USE:** Touring  
**CONSTRUCTION:** PC In-mold with EPS liner & PC bottom wrap  
**FIT SYSTEM:** Halo 270  
**APPROX. WEIGHT:** 350 g  
**SIZE:** S, M, L

- FEATURES:**
- Lightweight construction
  - Ski standard
  - Performance touring padding that can be used with a beanie
  - Passive Venting System
  - Headlamp Fixation

- ECO-FEATURES:**
- Min 50% Recycled EPS liner
  - 100% Recycled PES webbing
  - 100% Recycled PC vent plates
  - More than 33% Eco-content by weight

TECHNOLOGIES & FIT SYSTEMS

CONSTRUCTION

**PC IN-MOLD CONSTRUCTION**

- + Lighter, more comfortable and better aesthetic
- + A polycarbonate shell fused with an impact-absorbing foam liner

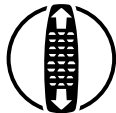

**ABS CONSTRUCTION**

- + Durable and strong
- + ABS outer shell paired with an EPS liner

VENTILATION

**DUAL ACTIVE VENTING SYSTEM**

Our most advanced venting system allows the user to carefully regulate the airflow through the helmet for optimal ventilation in any weather condition. This is achieved through two easy-to-use sliders that allow the ventilation to be fine-tuned at the front and top of the helmet.

**ACTIVE VENTING SYSTEM**

This system revolves around one easy-to-use slider that opens or closes multiple venting holes, allowing the user to optimally regulate ventilation in all weather conditions.

**PASSIVE VENTING SYSTEM**

Built-in system regulating the airflow through the helmet.

FIT SYSTEMS

-  uncomfortable
-  neutral sensation
-  comfortable

**HALO 270 FIT SYSTEMS**

Our ultra-light HALO Fit System provides easy adjustability and unparalleled comfort. Find the perfect height of the rear ergonomic cradle while the helmet is on your head and dial in optimal pressure using the micro-adjustment dial. The result is a helmet which adapts to your head shape and leaves you feeling secure and focusing on the line ahead.

**THE WRAS FIT SYSTEM**

Offers full adjustability to ensure a customized and comfortable fit for your head shape. Adjust the height of the rear ergonomic cradle and dial in the perfect pressure using the micro adjustment dial. WRAS is forseen of a big comolded wheel that makes it easy to grab and adjust with gloves. WRAS ensures your helmet fits securly and comfortably.

**JRAS FIT SYSTEM**

This fit system can be adjusted vertically allowing you to keep your helmet secure whilst skiing.

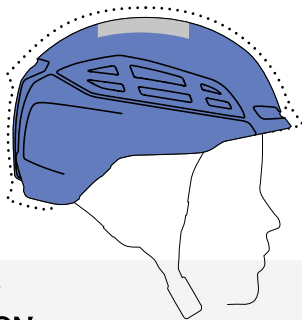

**MIPS INTEGRATED FIT SYSTEM**

Having a MIPS integrated system allows for improved comfort and fit, this is also enhanced by a 360 fit system. This improves your ability to keep your head comfortable and secure while skiing, as well as ultimately reducing the rotational violence transmitted to the brain.

SCOTT SAFETY TECHNOLOGIES

**CASIDION**

**CASIDION® TECHNOLOGY**

- + Increased protection in bigger impacts
- + Outperforms EPS foam in terms of impact absorption
- + Reduced stand-off

Casidion® insert

Thickness of the scott Couloir

Thickness of the scott Couloir 2

**360° PURE SOUND TECHNOLOGY**

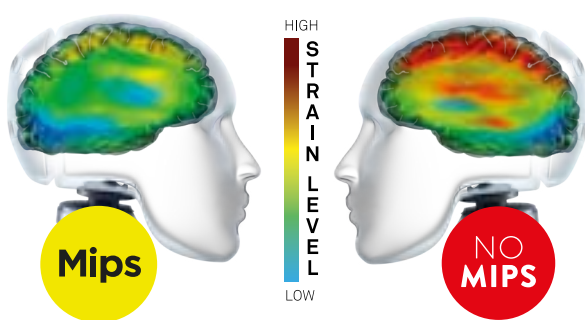

An exclusive SCOTT technology

- + Hear better, hear more
- + Specifically shaped inner piece increases sound localization
- + Rubber insert with perforations surrounded by transparent fabric

**MIPS® TECHNOLOGY**

- + MIPS® is a unique technology intended to protect your brain against angular impacts
- + Reduces the rotational violence transmitted to the brain

## GOGGLES

# SPHERE OTG GOOGLE

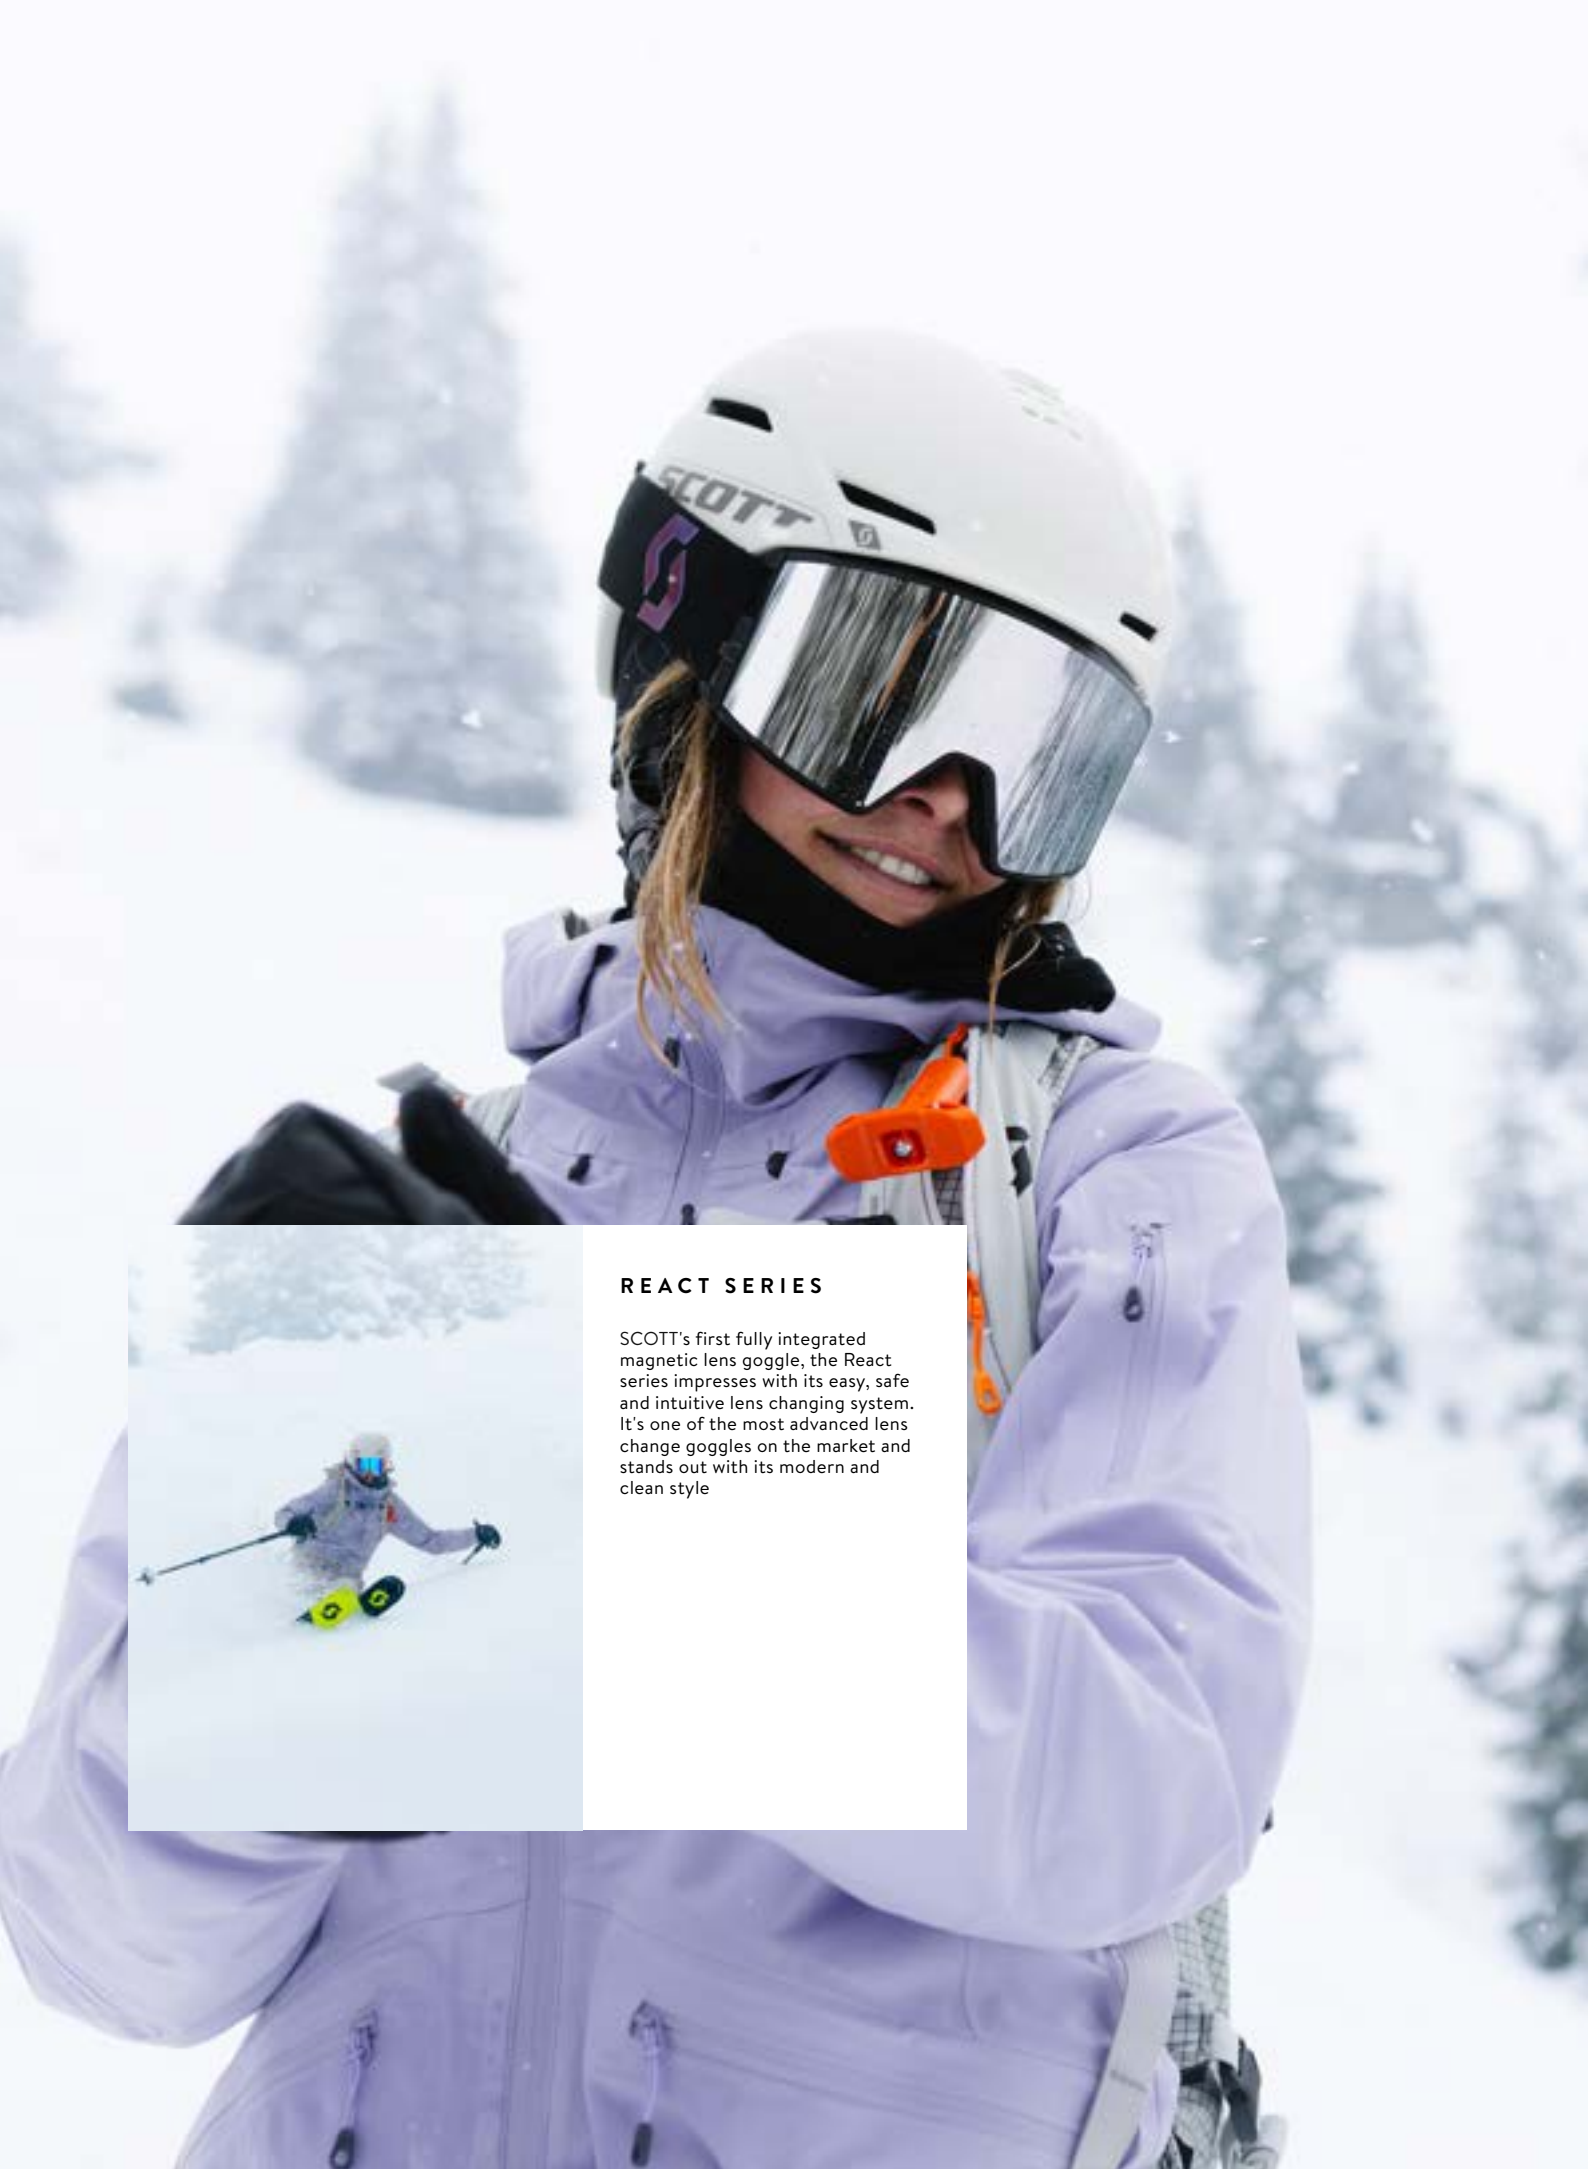

The SCOTT Sphere OTG is the perfect goggle for people who wear glasses when skiing. The integration of SCOTT's Amplifier Lens Technology takes clarity to a whole new level, through enhancing colour and contrast definition. Featuring a 3-layer face foam and an integrated RAM air ventilation system, allows for clear vision all day long.

# REACT GOOGLE

The SCOTT React goggle combines design with performance and impresses with its fully integrated magnetic lens change system. With the magnetic system, the lens change handling is intuitive and easy, even with gloves. All React goggles come with two different lenses, so that you always have the best vision no matter the conditions. Its clever design offers a perfect face fit and comfort, largely thanks to it's NoSweat microfibre face foam.

REACT SERIES

SCOTT's first fully integrated magnetic lens goggle, the React series impresses with its easy, safe and intuitive lens changing system. It's one of the most advanced lens change goggles on the market and stands out with its modern and clean style

# AMP AMPLIFY YOUR VISION

## WHAT IS THE AMPLIFIER LENS TECHNOLOGY?

The Amplifier Lens Technology amplifies specific wavelengths of light that pass through the lens into the eye to optimize contrast and clarity. This way, you amplify your vision to see details you could otherwise not see with the naked eye, while shredding down any terrain covered in snow. Every goggle in the range features the Amplifier Lens Technology, to make sure you can see everything, no matter the conditions.

TECHNOLOGIES

SCOTT  
PRECISION OPTICS

POLARIZED

Polarized lenses reduce glare and reflections from surfaces like glass and water and significantly improve visual comfort. The lens features a filter that lets in light rays approaching vertically and blocks horizontal light waves bouncing off shiny surfaces.

Grey Eco Polarized - cat 3 - VLT 17%

ALL CONDITIONS

With changing light conditions in mind, we have put a lot of time and energy into developing what we consider to be one of the most useful aspects of any rider's kit - Light Sensitive Lenses. Depending on the intensity of UV and visible light, these lenses are formulated to change from light to dark and back in matter of seconds to provide you with the ideal level of visibility and light protection.

Grey light sensitive - cat 1-3 VLT 10% - 65%

SUN

When enjoying a very bright sunny day, you encounter strong light that contains a very intense blue light. At high intensity, this blue light can be dangerous for the eyes. In addition, due to this high intensity, the ambient brightness makes it hard to focus on other colors and therefore reduces contrast. These lenses filter out as much of the blue rays as possible while keeping the ones that help definition and clarity.

Blue chrome - cat 3 - VLT 13%

Teal chrome - cat 3 - VLT 16%

Grey - cat 3 - VLT 11%

Bronze chrome - cat 3 - VLT 13%

Red chrome - cat 3 - VLT 14%

Brown - cat 3 - VLT 12%

Green chrome - cat 3 - VLT 13%

Grey eco - cat 3 - VLT 17%

Gold chrome - cat 3 - VLT 12%

Brown eco - cat 3 - VLT 12%

OVERCAST

We used our expertise to develop the perfect lens technology for medium-light conditions. These are ideal for partly sunny, partly cloudy days or areas partially in the shade. These lenses decrease eye fatigue by reducing the overall brightness of the environment.

Blue chrome enhancer - cat 2 - VLT 40%

Pink chrome - cat 2 - VLT 23%

LOW LIGHT

In low-light conditions, you need lenses for maximum contrast and terrain definition. This category of lenses will let through more light and make the details pop while still offering certain protection from the blue light rays.

Red chrome enhancer - cat 1 - VLT 46%

Green chrome enhancer - cat 1 - VLT 45%

NIGHT

In order to ensure that riders are safe from the impact of flying debris and protected from wind at very low light conditions, we offer clear lenses. These lenses let through the most light and are ideal for night rides.

Clear - cat 0 - VLT 92%

# PROTECTION

# AIRFLOW FREE

The Airflow Free plate has been designed to enhance your freedom of movement when skiing. It's extremely flexible, allowing the plate to move with your movements. The airflow free plate offers a high level of protection, but at the same time boasts a very low profile, so you'll hardly know you're wearing it.

## WHAT YOU NEED TO KNOW

SCOTT EXCLUSIVE DESIGN  
USING D30® TECHNOLOGY

EXTREMELY FLEXIBLE

LOW PROFILE

HIGHLY VENTILATED

LEVEL 1 PROTECTION

### ADULT PROTECTION

Our adult protection includes men, women and unisex products. With comfortable, breathable and protective features, this enables you to shred the slopes knowing you're well protected.

SCOTT VEST AIRFLOW FREE M'S

420615

**SIZE:** S, M, L, XL
- FEATURES:**

  - Low profile, flexible and ventilated back plate
  - Removable back plate for washing
  - Adjustable belt to simplify life: First-time adjustment only, ergonomic plate fit, avoiding stomach pressure.
  - Full-zip closure
  - Durable recycled mesh for enhanced breathability

# WAISTBAND CONSTRUCTION

For MY25, we are coming with a new waistband construction for all our vest protection products. This new waistband is very user friendly, where we have integrated a one-time Velcro adjustment belt. Having the adjustable Velcro straps on your sides, removes the pressure from your stomach and allows the vest and plate to sit comfortably. With an ergonomic plate fit, this allows the protection plate to stay close to your back, meaning no matter your movements, the back plate will stay in its position.

## THERE ARE THREE EASY STEPS TO FOLLOW, TO ENSURE AN EPIC DAY OUT ON THE SKIS

1

Put the vest on and zip it up

2

Adjust the Velcro for an optimised and comfortable fit

3

Unzip the vest. It's now ready for you next trip to the mountains and no re-adjustment is needed

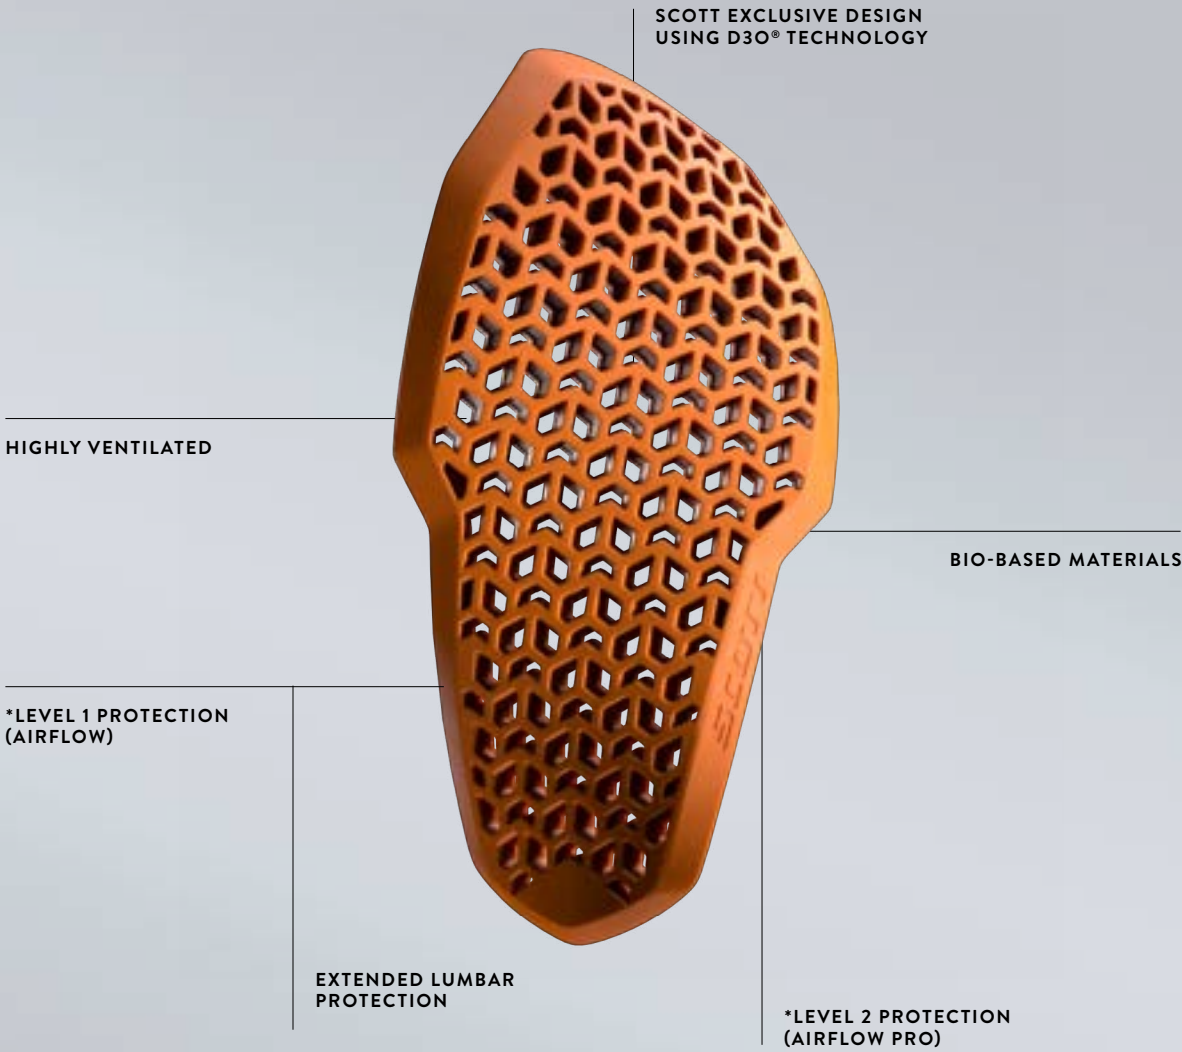

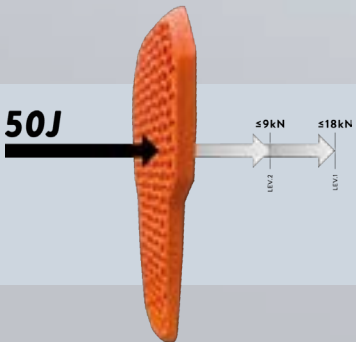

# AIRFLOW & AIRFLOW PRO

The Airflow & Airflow Pro plates have been exclusively designed for SCOTT using D3O® Technology. These plates are ready to keep you safe no matter what skiing adventure you go on, while reducing the impact on our winter playground. The unique design of the plate ensures a high level of breathability, allowing you to stay cool and comfortable during even the most rigorous runs.

## WHAT YOU NEED TO KNOW

During the test, the plate is hit with an impact of 50J on the outside part. If the force measured is equal or under 9kN, the plate is categorized as level 2 (the most protective plate). If it is between 9kN and 18kN, it's categorized as Level 1

\*CERTIFICATION  
ALL OUR PROTECTORS ARE CERTIFIED ACCORDING TO CURRENT EUROPEAN STANDARDS - EN 1621-2: 2014.

PROTECTION TECHNOLOGIES

**D3O® IMPACT PROTECTION TECHNOLOGY**  
D3O® is a unique material that focuses on energy dispersion in critical areas for maximum shock absorption and protection. The functionality of the raw material originates from the synergetic effects of the polymer-based dilatant. Energy is distributed throughout the synthetic elastomeric polymer and the enhanced chemistry continues to disperse the energy throughout the matrix, significantly reducing the effect of impact.

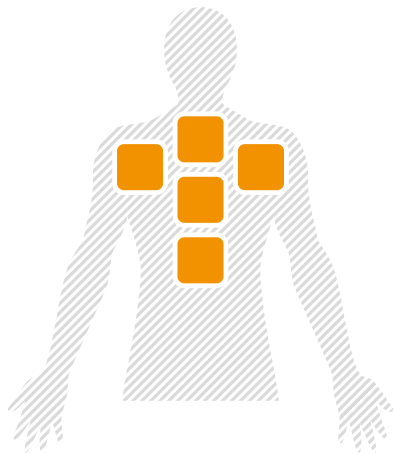

**SHOCK ABSORPTION**  
D3O® technology focuses on energy absorption and protection.

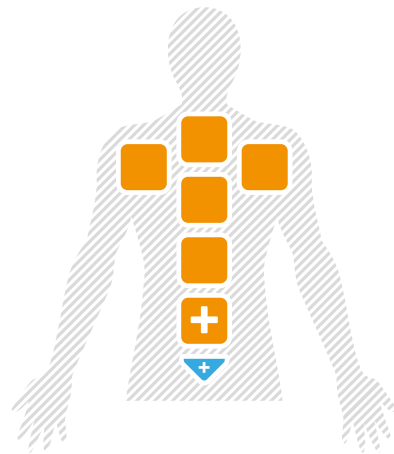

FEATURES

PROTECTION BEYOND STANDARDS  
EXTENDED LUMBAR SUPPORT

For improved protection of your back and spine, with extended support in the crucial lumbar area. We are proud to offer protection that goes beyond the standard and elevates your safety by covering more of your crucial body parts.

**STANDARD PROTECTION AREA**  
As required by standard  
EN 1621-2: 2014

**SCOTT EXTENDED LUMBAR SUPPORT**  
SCOTT Airflow offers a further lumbar support  
with D3O® technology.

# SKI TRANSPORT WHEEL BAG

Designed with convenience and durability in mind, this ski transport wheel bag has been developed to carry two pairs of skis, along with their accompanying poles. The interior boasts tear-resistant and robust material ensuring your ski equipment stays well protected, no matter what snowy destination you head to. When not in use, the foldable construction allows for easy storage, making it a breeze to stow away in the off-season.

# SALES SUPPORT

NEW SCOTT RETAIL SYSTEM

# COLOR & MATERIALS

Color and material selections are carefully curated to enhance SCOTT's products. They are durable and authentic, making the concept a reliable investment for retailers.

# WALL SECTIONS

The SCOTT Retail Wall Sections serves as the cornerstone of the SIS concept. With its high-level product display and captivating image possibilities, it creates an attention grabbing atmosphere within the store environment. Whether fixed to permanent walls or freestanding to create new exciting customer paths, the wall sections enhances the store's visual appeal and elevates the overall customer experience.

## IMPLEMENTATION OF WALL SECTIONS

When planning for the implementation of wall sections, it is essential to prioritize the customer experience. If there are existing permanent walls available for attachment, the use of freestanding wall sections may not be necessary, although they can still serve the purpose of dividing product categories. The concept of wall sections can also be effectively employed in a freestanding manner when creating a new customer path

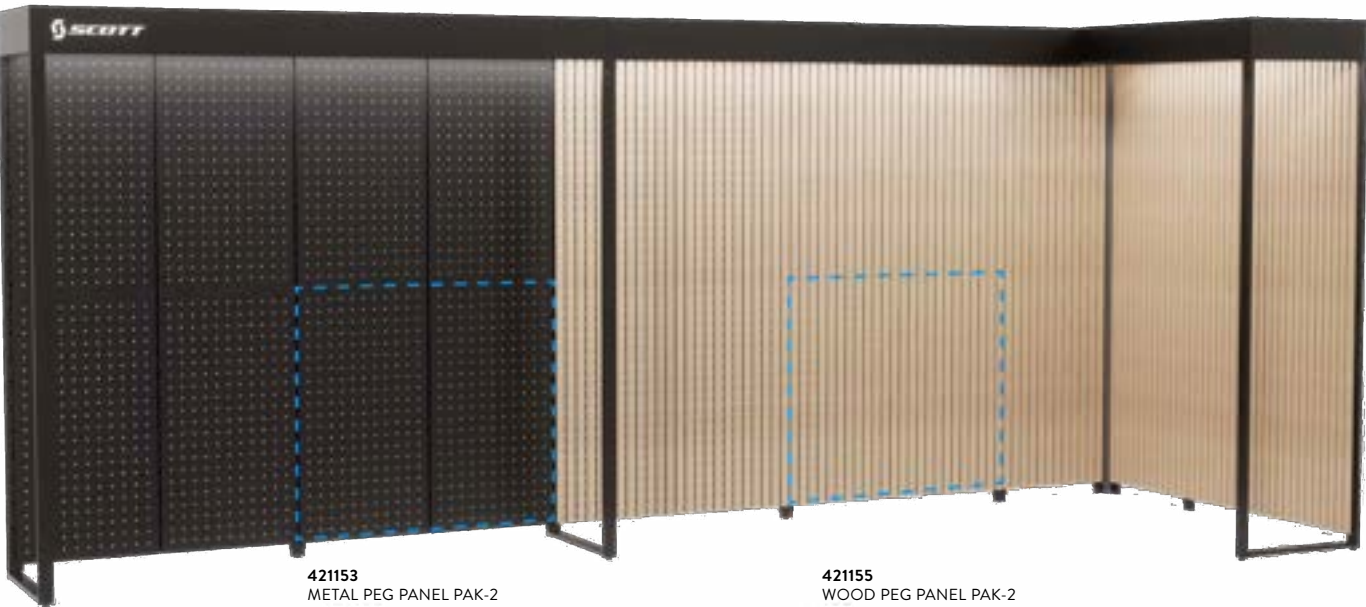

within a store, without the need for constructing new permanent walls. It is important to carefully measure the intended areas and ensure that there are no obstacles to the construction, such as ventilation systems, etc. Subsequently, the order should be planned starting from the left, as outlined below...

# 1/ START HERE

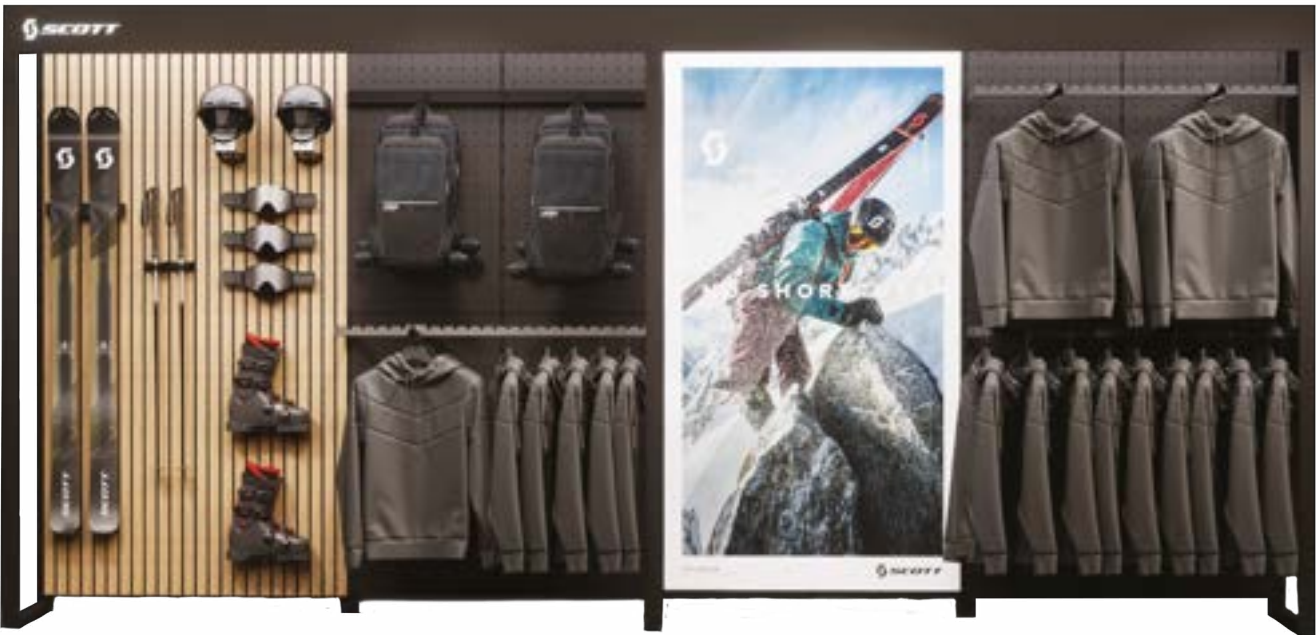

# 2/ ADD PANELS

Be creative planning the panels, still with focus on the customer experience.

# 3/ ADD ACCESSORIES

Choose from a wide variety of accessories.

# FABRIC FRAMES

The use of images in retail design plays a key role in creating an engaging and attractive shopping environment. They foster an emotional connection with customers, enhance the visual appeal of spaces, and guide consumer behavior. Images serve to highlight specific products, promote offers, and reinforce brand identity. Therefore, strategic use of imagery is crucial for a successful retail experience, promoting sales, building brand loyalty, and standing out.

# ELECTRONIC DATA INTERCHANGE

## WHAT IS EDI – ELECTRONIC DATA INTERCHANGE

Improve your business efficiency and simplify work with SCOTT's electronic data interchange (EDI) SOLUTION. EDI is a solution for computer-to-computer exchange of business documents in a standard electronic format between business partners.

These business documents cover a wide range of options from placing an order, fulfilling the product database with prices, EAN code, product descriptions, or even exchanging electronic invoices, and in some contexts, optionally exchanging stock level information.

### TRADITIONAL INFORMATION EXCHANGE

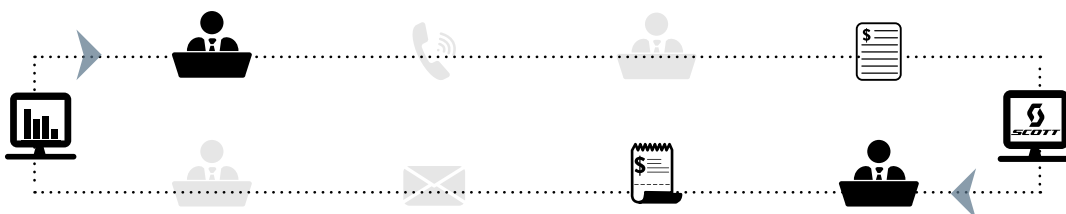

### SCOTT EDI SOLUTIONS HELP YOU TO BECOME MORE EFFICIENT

By proceeding with IT connection between our Business Software and your Business Software, both yourself, your collaborators and SCOTT's employees

- ✓ Avoid manual operations
- ✓ Save employees time
- ✓ Avoid human error
- ✓ Simplify business documents and information exchange

### WITH EDI AUTOMATIC EXCHANGE

### WHO CAN BENEFIT FROM OUR SCOTT EDI SOLUTIONS?

EDI is an electronic format that every business can use, so long as both partners have Business Software compatible with EDI solution.

If you are unsure, contact your IT service provider and ask!

### HOW MUCH DOES EDI INTEGRATION COST?

SCOTT offers a range of EDI integration solutions in different data formats. We do not charge anything for the service of integrating with your EDI-ready solution.

The only cost for you would be the cost of enabling EDI capability on your Business software, with your habitual IT service provider.

### WHAT EDI SOLUTIONS DOES SCOTT OFFER AND HOW COULD I BENEFIT FROM THE SERVICE?

#### STEP #1

Check with your IT provider if you can handle EDI integration, and what it would cost for you. To make the process smoother you can share the technical documentation delivered here:

[WWW.SCOTT-SPORTS.COM/EDI](http://WWW.SCOTT-SPORTS.COM/EDI)

#### STEP #2

If your IT Provider confirms your ability to benefit from EDI integration, please contact your usual SCOTT Sales Representative or SCOTT Customer Service, they will deliver all the necessary information for organizing the next steps.
