EVOLVING THE RIDE > LEVEL'S NEXT CHAPTER

Born in the heart of the Alps, LEVEL has always stood for more than just gloves. We build gear that rides with you – from icy chairlift mornings to endless freeride descents – built for those who chase performance, warmth, and connection with the mountains.

Today, our mission goes beyond protection and comfort. It's about responsibility – creating products that respect the planet that gives us our playground. From recycled and certified fabrics to ethically sourced leathers and long-lasting construction, every detail is chosen with purpose. Because real performance doesn't stop at the slopes – it continues in how we treat what surrounds us.

Three decades of innovation have taught us that durability is sustainability. That the perfect glove isn't just one that keeps your hands warm – it's one that lasts season after season, earning every scratch and story along the way.

LEVEL is moving forward – lighter, greener, stronger – guided by passion, driven by athletes, and fueled by a simple goal: keep you ready for whatever the mountain throws your way.

INNOVATIVE SOLUTIONS

PUSHING THE LIMITS OF COMFORT, PERFORMANCE, AND PROTECTION.

Level's R&D team keeps redefining glove technology season after season. From patented ergonomic designs to next-generation materials, these innovations represent the cutting edge of warmth, flexibility, and durability on the mountain.

1. **ERGONOMIC THUMB CONSTRUCTION (UNDER PATENT):**

Introduced on the flagship World Cup Mitt and World Cup 5-Finger, this new ergonomic thumb design offers dual benefits: dynamic support with excellent flex and built-in shock absorption in case of impact.

2. **ENHANCED FLEX ON BACKHAND:**

A new flexible structure on the back of World Cup Mitt and World Cup Finger provides superior dexterity, reducing hand fatigue during pole grip while ensuring extra protection thanks to Superfabric® reinforcements.

3. **SUPERFABRIC® BUMPER PROTECTION :**

Added to the SQ Finger and SQ Mitt, protective Superfabric® bumpers on the thumb enhance safety and impact resistance at the base of the pole.

4. **NEXX4™ WOLF PATTERN TECHNOLOGY:**

A new application of NexX4™ technology with a distinctive wolf-pattern design on the back of the fingers. Developed for high-speed disciplines, it boosts abrasion resistance on icy snow while creating a unique and iconic glove design. Featured on World Cup 5-Finger, Speed, and Speed Mitt.

5. **PATENTED STRECH PALM:**

An elastic insert on models like Jag, Luna, Northstar, and White Star delivers two major advantages, greater palm stretch for improved flexibility and reduced bulk when gripping the pole.

6. **AEROGEL INSULATION – NASA TECHNOLOGY:**

Now introduced in the Racing collection, AEROGEL insulation – originally developed by NASA for astronaut gloves – provides unmatched thermal protection in extreme cold.

7. **SEAM-FREE FINGER CONSTRUCTION:**

In the Mountain Light line, the best-selling Trail Polartec Powerstretch glove now features a new finger construction with no inner gussets, eliminating palm seams for maximum comfort and sensitivity.

THE LEVEL SUSTAINABILITY JOURNEY

Over the years, Level has evolved its commitment to sustainability from the Green Choice initiative into a more sustainability program.

Today, our mission extends to reducing our footprint at every stage, from materials and production to logistics and community engagement.

We're reshaping our processes to minimize CO₂ emissions, improve circularity and design products that last longer and waste less.

OUR MAIN SUSTAINABLE DEVELOPMENT GOALS (SDGS) & ACTIONS

SDG 3: Good Health and Well-Being

PRIORITIZING SAFETY AND COMFORT: We design ski gloves with ergonomic support and high performance insulation to keep users warm and safe in extreme conditions, reducing cold related injuries.

SDG 8: Decent Work and Economic Growth

ETHICAL LABOR PRACTICES: We partner with factories that meet international labor standards and ensure fair wages.

SDG 9: Industry, Innovation and Infrastructure

INNOVATIVE MATERIALS: We develop gloves using recycled and recyclable components, tested for durability and long-lasting performance in extreme conditions.

SDG 12: Responsible Consumption and Production

ECO-CONSCIOUS DESIGN: We use recycled and responsibly sourced materials, minimize packaging, and promote recycling to reduce overall waste.

SDG 13: Climate Action

REDUCE CARBON FOOTPRINT: Our objective is to reduce carbon emissions throughout the value chain by addressing material sourcing, production, logistics, and end-of-life management.

SDG 15: Life on Land

EDUCATION & ADVOCACY: We engage in eco-awareness initiatives to inspire our customers to protect alpine environments by partnering with Protect Our Winters (POW), an organization dedicated to mobilizing the outdoor community for climate action.

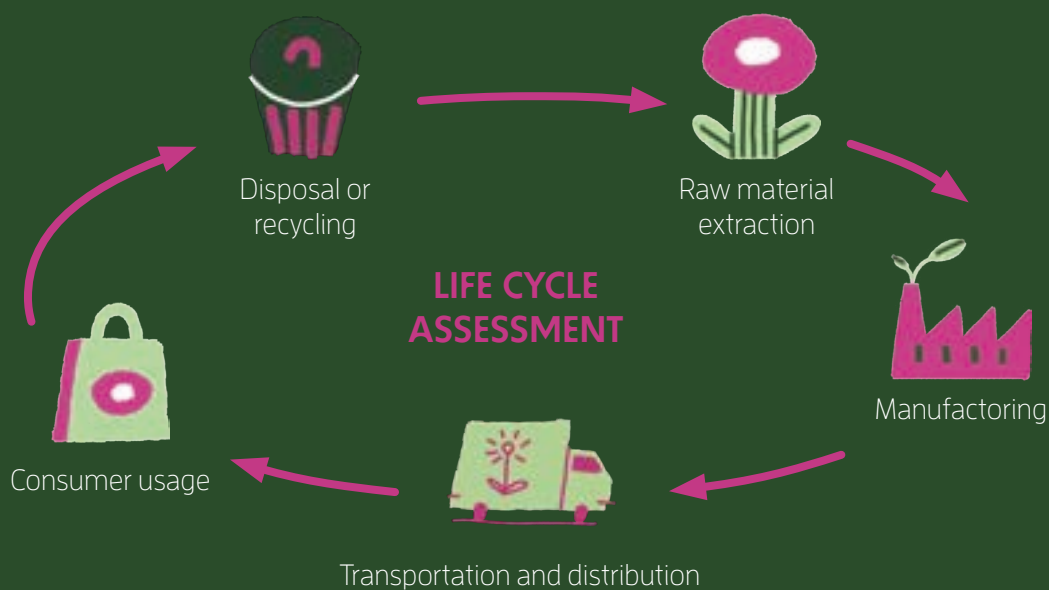

SDG 17: Partnership for the Goals

COMMUNITY ENGAGEMENT: We partner with organizations and young athletes to promote environmental awareness and protect alpine ecosystems.

OUR RESULTS

TURNING GOALS INTO MEASURABLE IMPACT

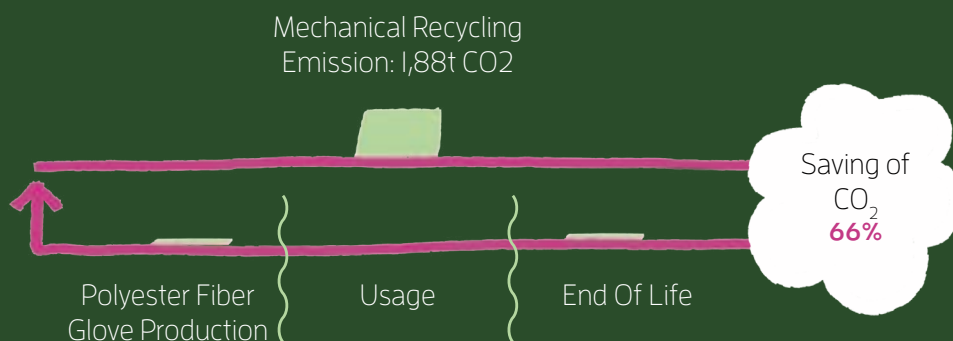

- 65% GREEN CHOICE MODELS: made with at least 50% recycled or organic materials.
- 300,000 HANGERS REPLACED WITH RECYCLED CARDBOARD (PLASTIC-FREE PACKAGING).
- CO₂ REDUCTION IN LOGISTICS: air freight reduced from 50% > 30%, sea freight increased to 70%.
- PARTNERSHIPS WITH REMATRIX & RE-SPORT: pioneering glove recycling and life cycle assessment (LCA) methods.

LCA OF JUNIOR ANIMAL MITTENS

Made from 100% recycled materials, including polyester from PET bottles, our Junior Animal Mittens embody circular design. After removing non-polyester parts, the material is mechanically recycled, purified with PURELOOP technology, and reinforced with a small share of virgin fibers for strength. The result is a durable, high-performance glove with lower CO₂ emissions and reduced reliance on fossil resources.

RECYCLED GLOVE WITH RECYCLING = JUNIOR ANIMAL MITTENS

BUILDING A CIRCULAR FUTURE (VISION 2030)

DESIGNING FOR CIRCULARITY

Our 2030 sustainability vision focuses on keeping materials in use longer and reducing waste across our production chain.

- 80% OF ALL MODELS IN THE GREEN CHOICE LINE.
- 30% ADDITIONAL CO₂ REDUCTION.
- 100% RECYCLED OR ORGANIC PACKAGING.
- 15% MAXIMUM AIR FREIGHT.
- EXPANSION OF TAKE-BACK AND RECYCLING PROGRAMS.

BUILDING A CIRCULAR ECONOMY

We are committed to building a circular economy within our industry, ensuring that every glove is designed with its entire life cycle in mind. A circular economy means rethinking the way we create and consume. Instead of the traditional “make, use, dispose” model, we’re focused on keeping materials in use for as long as possible through better design, smarter sourcing, repair, reuse, and recycling.

A glove becomes circular by focusing on three key aspects:

Smart Materials: choosing recycled and responsibly sourced fabrics, leather, and insulation, reducing the use of virgin resources and lowering emissions. We also hold our supply chain to high standards ensuring transparency, ethical sourcing, and adherence to strict material compliance regulations.

Use More, Waste Less: designing gloves to be durable, repairable, and long-lasting. Our goal is to make gear that you’ll use season after season, not just once.

Responsible End-of-Life: creating take-back and recycling programs that ensure our gloves don’t end up in landfills, but instead get a second life as insulation, fibers, or even new products.

COMMUNITY & RESPONSIBILITY

SUSTAINABILITY IS A SHARED MISSION

LEVEL places strong emphasis on building a vibrant community and forging strategic partnerships to actively support environmental causes. The brand collaborates with organizations such as Protect Our Winters (POW), promotes initiatives like Save Soil, and contributes to the preservation of National Parks, demonstrating a commitment to protecting natural landscapes both locally and globally.

Beyond partnerships, LEVEL fosters direct community engagement by encouraging young skiers, athletes, and outdoor enthusiasts to participate in clean-up efforts, educational workshops, and awareness campaigns. These activities not only help maintain alpine environments but also cultivate a sense of responsibility, empowering the next generation to become environmental stewards.

Through these combined efforts, LEVEL aims to create a culture of sustainability within the ski and outdoor community, inspiring long-term behavioral change and reinforcing the connection between sport, nature, and climate action. By actively involving its community, the brand ensures that environmental protection is a shared mission rather than a solitary effort.

THERMOPLUS

THERMOPLUS is LEVEL's proprietary system designed to ensure superior warmth and comfort in winter gloves. What sets LEVEL apart from other brands is its direct control over the entire production process. LEVEL purchases all materials directly, carefully inspects and tests them in-house using advanced technology before moving to production. This contrasts with most other glove brands that outsource their material selection, losing control over quality.

• WHY THERMOPLUS IS DIFFERENT:

MATERIAL SELECTION: LEVEL personally selects and rigorously tests all materials to ensure they meet the highest standards for thermal insulation and ergonomic comfort. Other brands may not have this level of control over the quality of their raw materials.

IN-HOUSE TESTING: LEVEL uses specialized machines, wireless sensors, and infrared thermography in its own lab to test glove performance in extreme conditions. This guarantees that each pair of gloves provides consistent warmth and protection.

• THERMOPLUS PERFORMANCE LEVELS:

TO MAKE IT EASIER FOR CUSTOMERS TO CHOOSE THE RIGHT GLOVES FOR THEIR NEEDS, LEVEL HAS INTRODUCED A SIMPLE 5-LEVEL THERMOPLUS CERTIFICATION SYSTEM:

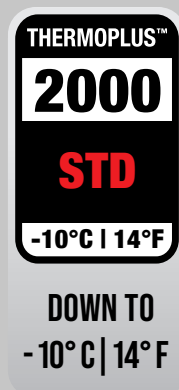

5000 – EXTRA WARM: Down to -30°C (-22°F) for extreme cold.

4000 – VERY WARM: Down to -22°C (-8°F), providing intense warmth for the coldest days.

3000 – WARM: Down to -17°C (0°F), offering balanced warmth and comfort.

2000 – STANDARD: Down to -10°C (14°F), perfect for moderately cold days.

1000 – LIGHT: Down to -5°C (23°F), ideal for mild winter conditions.

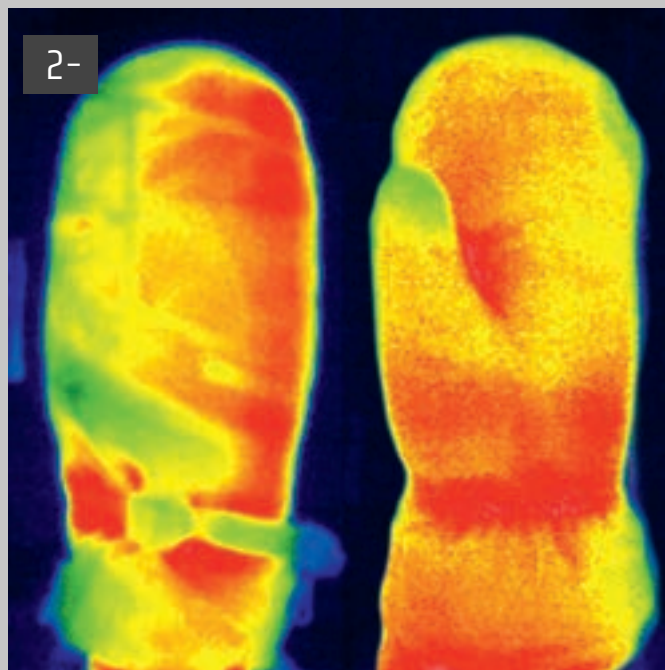

SCIENTIFIC TESTS PERFORMED UNDER THE AUSPICES OF THE DICAM
DEPARTMENT OF BOLOGNA UNIVERSITY – ITALY

• HOW LEVEL ENSURES QUALITY:

1- SPECIALIZED TESTING MACHINE: LEVEL developed a machine to test gloves under extreme weather conditions, collecting data on how well they retain heat.

2 - INFRARED THERMOGRAPHY: This technology visually tracks how the gloves maintain warmth, allowing LEVEL to identify and address any areas where insulation may be lacking.

3 - HAND SENSORS: Placed directly on the skin, these sensors record how well the gloves perform in real conditions, ensuring the data reflects actual user experiences.

3 YEAR WARRANTY PROGRAM

At LEVEL, product durability has always been a top priority. Our gloves are among the longest-lasting in the market, which is why we are confident in offering a warranty that goes beyond what is required by law. This allows us to provide superior customer support and stand behind the quality of our products.

- **WHY LEVEL'S WARRANTY IS UNIQUE:**

DURABILITY FOCUS: LEVEL places fundamental importance on the durability of its gloves, resulting in a product with a long life cycle. This makes our gloves more reliable and cost-effective for the consumer.

THREE-YEAR WARRANTY: While most brands only offer a basic guarantee, LEVEL provides a 3-year limited warranty against manufacturing defects on all products. This warranty reflects our confidence in the longevity of our gloves and covers defects beyond normal wear and tear.

- **WHAT'S COVERED:**

- The warranty covers manufacturing defects for a period of 3 years from the initial purchase date.
- The warranty excludes damage caused by normal wear, misuse, accidents, or unauthorized repairs.

- **HOW TO ACTIVATE AND USE THE WARRANTY:**

ACTIVATION: To activate your warranty, visit LEVEL's online registration page within 14 days of purchase and upload your receipt.

CLAIMS: In case of a defect, bring your product along with the original purchase receipt to any authorized LEVEL retailer. LEVEL will repair or replace the product if the defect falls under the warranty's conditions.

- **WHY WE OFFER THIS WARRANTY:**

By focusing on the best materials and precise manufacturing, LEVEL creates products that last longer, providing better value for customers. Our Three Year Warranty is proof of our commitment to producing gloves that not only perform exceptionally but also stand the test of time.

CUSTOM FIT

LEVEL's Revolutionary Custom Fit System brings an entirely new dimension to hand-wear. Say goodbye to one-size-fits-all and embrace a glove that molds perfectly to the unique contours of your hand.

Our secret lies in a breathable thermo-formable padding material engineered for durability, warmth, and comfort. By heating it to a precise 80°C, it seamlessly conforms to the shape of your hand, creating a glove that's as unique as your fingerprint. What makes this system truly exceptional is its repeatability – you can customize your glove as often as you like to ensure the perfect fit every time you hit the slopes.

But that's not all. LEVEL's Custom Fit isn't just about fit; it's about enhancing your skiing experience. Expect elevated comfort, heightened sensitivity, and an improved grip on your ski-pole handle. Our thermo-formable material boasts outstanding qualities, from its lightweight nature to excellent memory and minimal shrinkage during shaping. It's re-moldable, possesses high bond strength, is non-toxic, and doesn't absorb water.

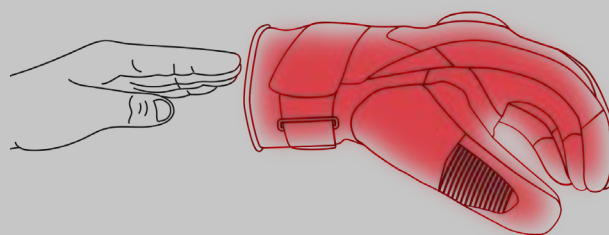

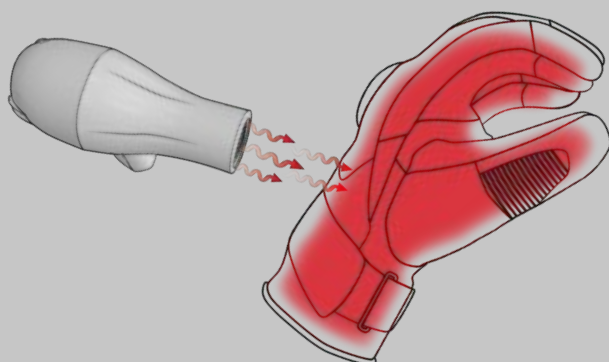

• MADE FOR PROS:

Durable – Warm and comfortable
 Lightweight – Heat Moldable (Thermo-formable)
 Excellent memory
 Low shrinkage when heated, shaped and cooled
 Re-moldable
 High bond strength
 Non-toxic
 Does not absorb water

• HOW TO CUSTOMIZE:

1 – Heat the outside of the glove with a domestic hairdryer at a maximum temperature of 80 degrees at a distance of 30 cm or where available, use the LEVEL oven –

2 – Put the glove on, close the strap and let it cool for about 5 minutes –

THIS CUSTOMIZATION PROCESS CAN BE REPEATED AS OFTEN AS WANTED.

FIT SYSTEM

LEVEL's Fit System is designed in collaboration with athletes to meet the specific needs of skiers and snowboarders. Our gloves are available in three distinct fits, each tailored for different uses and comfort levels. Understanding these fits will help customers find the perfect gloves for their activities and preferences. For over 35 years, LEVEL has continually evolved and improved the fit of its gloves across all categories. This progress is the result of close collaboration with some of the most prestigious international ski schools as well as mountain professionals like alpine guides and instructors. Additionally, feedback from our World Cup athletes has played a crucial role in refining the fit. This ongoing effort has allowed us to create pre-shaped models that offer excellent comfort and warmth throughout our entire collection.

- **RELAXED FIT:**

BEST FOR: Skiers and snowboarders looking for extra warmth and freedom of movement.

WHY IT WORKS: These gloves have a roomier cut, allowing for more comfort without sacrificing warmth. The extra space makes them ideal for cold conditions, providing ample insulation to keep hands warm.

WHO SHOULD CHOOSE THIS: Skiers who love powder adventures and need a balance of warmth and mobility. Snowboarders, especially those using Biomex technology, who need wrist protection and a comfortable fit for long days on the slopes.

- **NATURAL FIT:**

BEST FOR: Skiers and snowboarders who need a very warm glove with a snug fit for precision.

WHY IT WORKS: These gloves naturally conform to the hand, providing excellent warmth and control. The snug fit ensures that hands stay warm while maintaining dexterity for precise movements.

WHO SHOULD CHOOSE THIS: Skiers who need warmth without losing the ability to handle ski poles or make precise movements. Snowboarders, particularly those who face cold weather, as this fit offers exceptional warmth and is a favorite of professional riders.

- **SLIM FIT:**

BEST FOR: Athletes and riders who prioritize better grip and maximum control.

WHY IT WORKS: The form-fitting design ensures a tight fit, allowing for superior feel and control. This fit is ideal for anyone needing a direct connection with their equipment, whether it's ski poles or a snowboard.

WHO SHOULD CHOOSE THIS: World Cup athletes and advanced skiers who demand high performance and precision. Freestyle snowboarders or anyone who wants a sleek glove that enhances grip and control on the board.

CUFF TYPES

Choosing the right cuff type is just as important as selecting the perfect fit. At LEVEL, we offer three distinct cuff options designed to suit different preferences and conditions on the mountain. Whether you're seeking maximum protection from the elements, a sleek, low-profile look, or the flexibility of both, our cuff types have been crafted with performance and comfort in mind.

- **OVER JACKET CUFFS:**

BEST FOR: Skiers and snowboarders who want maximum protection from the elements.

BENEFITS: The cuff extends over your jacket sleeve, sealing out snow and cold with a cinchable elastic cord. It's easy to take on and off, perfect for deep snow or bad weather, and allows airflow for temperature versatility on warmer days.

- **UNDER JACKET CUFFS:**

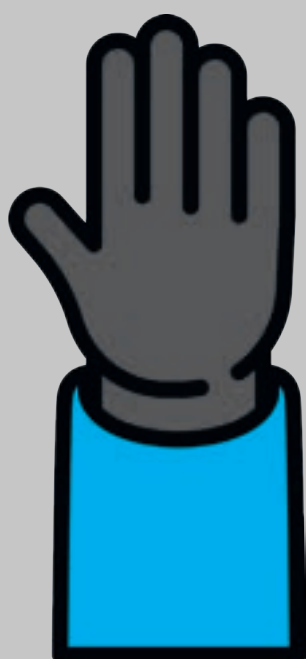

BEST FOR: Skiers and snowboarders seeking a low-profile, fashionable option.

BENEFITS: These cuffs are sleek and modern, designed to fit under the jacket sleeve for a clean look. They're lightweight and less bulky, providing wrist mobility and easy packing for travel.

- **HYBRID CUFFS:**

BEST FOR: Skiers and snowboarders who want the versatility of both cuff types.

BENEFITS: A perfect blend of over and under jacket styles, Hybrid cuffs offer flexibility in various weather conditions, providing both protection and a low-profile option depending on how they are worn.

HYBRID CUFF -

FINDING THE GLOVE SIZE

When it comes to selecting the ideal glove size, it's essential to consider two key measurements of your hand:

1. HAND LENGTH:

- Begin with your hand open and fingers extended.
- Measure from the tip of your middle finger down to the base of your palm, following a straight line.

2. HAND CIRCUMFERENCE:

- Start with your hand open and fingers extended.
- Measure the circumference of your hand, encircling it at the base of your knuckles.

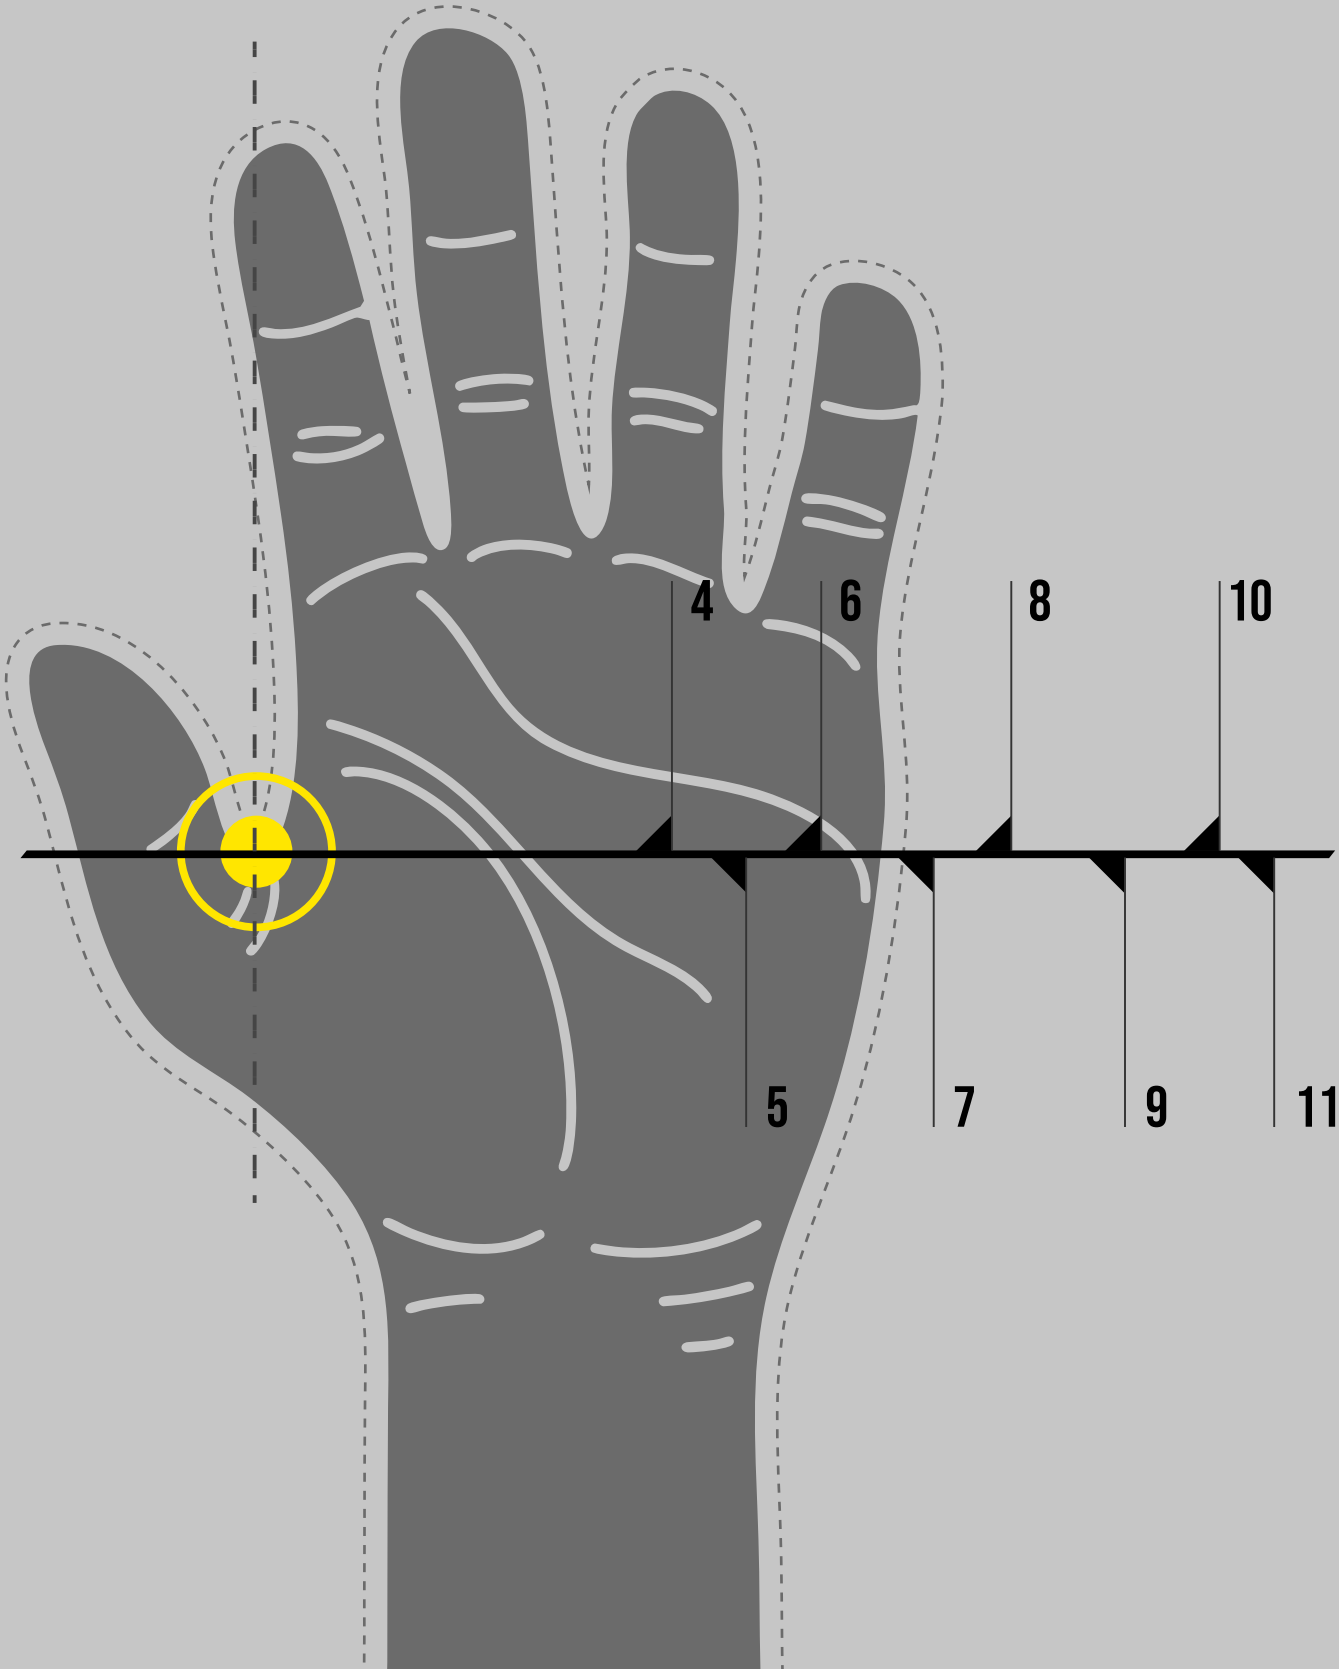

By taking both of these measurements into account, you'll be on your way to finding the perfect fit for your gloves, ensuring optimum comfort and performance during your winter adventures.

CIRCUMFERENCE		HAND LENGTH		MEN'S SIZE		WOMEN'S SIZE		JUNIOR'S SIZE

ALIGN YOUR HAND WITH THE YELLOW DOT

LEATHERS

At LEVEL, we're proud to uphold stringent standards in crafting premium gloves. Our commitment to responsible practices begins with sourcing leather from LWG (Leather Working Group) certified tanneries, ensuring quality and environmental responsibility.

- **WHY LEATHER IS IMPORTANT AT LEVEL:**

SPORTING TRADITION: Leather is not just beautiful—it's functional, providing the perfect balance between suppleness and durability for sport-specific uses.

ECO-FRIENDLY APPROACH: Our white leather products are chrome-free, and we're working to extend this process to all dyed leathers. We're also moving toward vegetable tanning, further enhancing the sustainability of our gloves.

- **TYPES OF LEATHER USED:**

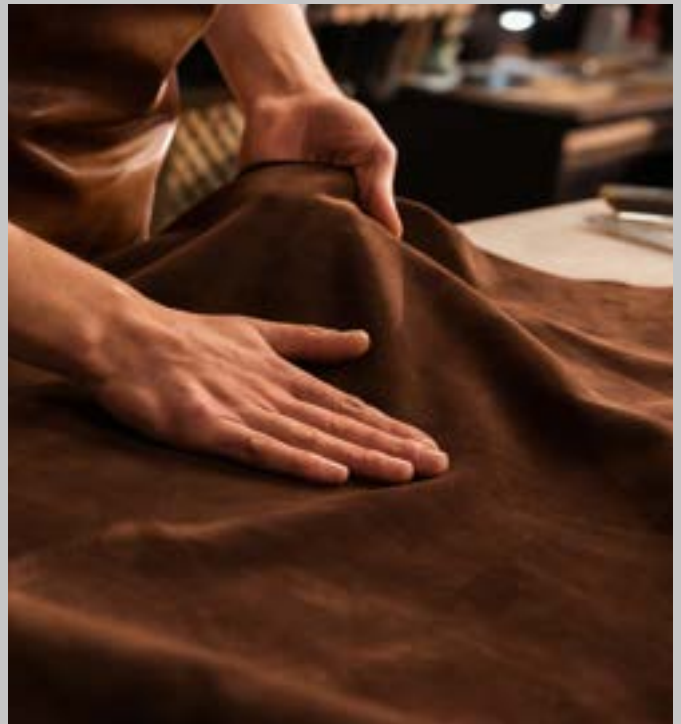

GOAT SKIN LEATHER: Known for its high resistance and softness, goat skin is used in products requiring durability, especially in freeride and professional gloves. Its waterproof properties make it ideal for high-abrasion areas like palms and between the thumb and index finger.

SHEEP SKIN LEATHER: This leather is exceptionally soft, making it ideal for women's gloves, especially on the back of the hand, where comfort and a sensitive, pleasant fit are priorities.

- **WHY WE CHOOSE THESE LEATHERS:**

GOAT SKIN: Used for gloves that need to withstand rugged conditions, providing resistance and softness, while maintaining a long-lasting, waterproof quality. It's ideal for freeride and professional-level products.

SHEEP SKIN: Specifically chosen for women's gloves due to its softness and luxurious feel, offering a comfortable fit that's perfect for more sensitive hands.

LEVEL LEATHER – HIGH QUALITY, LOW IMPACT

SUSTAINABLE, SAFE, AND ETHICAL LEATHER CHOICES

Environmental Impact: 30% Less Water

LEVEL's leather production process uses 30% less water compared to traditional methods. This significant reduction in water usage helps minimize the environmental footprint of our gloves, contributing to a more sustainable manufacturing process without compromising on quality.

Chemical Impact: No Harmful Chemicals

LEVEL is committed to producing leather that's free from harmful chemicals such as Chrome 6, Formaldehyde, Hzo, and Carbon. By avoiding these substances, we ensure that our tanning process is eco-friendly and safe, making our gloves better for both users and the environment.

Ethical/Social Impact: Worker Protection

At LEVEL, worker safety is a top priority. We implement strict safety procedures in all production facilities to protect our workers, ensuring that ethical practices are followed throughout the leather production process. This commitment guarantees a safe and fair working environment for everyone involved.

FABRICS

Quality Control and Direct Commitment: Thanks to our direct involvement in material selection, Level maintains 100% quality control over glove production. For us, the value of "quality" begins with the careful selection of fabrics, ensuring effectiveness in performance, comfort, warmth, durability, and resilience.

- **FABRIC SELECTION:**

We pay great attention to fabric selection, grounded in cutting-edge research and expertise with a strong focus on quality. Our R&D team regularly visits international expos to discover new materials, which are tested in our labs to ensure the highest standards. Additionally, we take direct control of the process by purchasing the raw materials ourselves and providing them to our producers on a processing account. This hands-on approach allows us to maintain strict quality control throughout production, ensuring that every LEVEL product meets our exacting standards.

- **FABRIC CERTIFICATION:**

All fabrics used in Level gloves come from specialized suppliers that guarantee certifications for every material.

- **RECYCLED FABRICS:**

Most Level products are now made using certified recycled materials, ensuring a sustainability level significantly above the market standard in the glove industry.

- **COLLABORATION WITH DESIGNERS AND INFLUENCERS:**

Collaborating with international designers and style influencers ensures our fabrics follow the latest trends and offer exclusive features that make them unique.

- **RESILIENCE AND TESTING:**

Level, as the inventors of the first snowboard glove, boasts extensive experience in this segment. This experience helps us develop abrasion-resistant gloves. We subject fabrics to rigorous tests to ensure seam and water resistance.

- **THREAD SELECTION:**

A testament to our quality pursuit is thread selection. Level employs four types of threads, tailored to specific product categories. The use of Polyester, Nylon, Kevlar, or Dyneema depends on the product type to ensure the best effectiveness in terms of strength, performance, and comfort. Level also provides manufacturers with specific instructions for proper thread use.

- **RACING LINE:**

Thanks to collaborations with some of the world's most successful athletes, we've created a "state of the art" racing glove line, utilizing materials such as Superfabric, Dyneema thread, Custom Fit, Graphene lining, and the Kirax system to achieve maximum protection and performance without sacrificing warmth.

- **MOUNTAIN LINE:**

Collaboration with mountaineers and guides, notably with internationally renowned climber Marco Confortola, has allowed us to develop gloves that withstand the harshest wear and extreme temperatures at 8,000 meters.

- **WOMEN'S LINE:**

Collaboration with international athletes and designers has resulted in a collection that combines fashion and sportiness, using high-quality fabrics like merino wool and waterproof velvet, offering the advantage of very soft yet durable leathers.

- **JUNIOR AND KIDS LINE:**

For this line, we've focused on highly waterproof and breathable fabrics, creating a colorful, high-quality collection.

In summary, Level emphasizes innovation, athlete collaboration, and quality in material selection and production, resulting in a wide range of products, each with a specific focus on customer needs.

LEVEL'S CERTIFIED FABRICS: PERFORMANCE MEETS RESPONSIBILITY

At LEVEL, certified fabrics ensure that our gloves meet the highest standards for both quality and sustainability. By incorporating GRS Recycle, Blue Sign, Oekotex, and PFC-free materials, we ensure our gloves are not only high-performing but also eco-friendly. These certifications help us minimize environmental impact and prioritize safety, aligning with LEVEL's commitment to responsible production and long-lasting quality.

GRS Recycle

Mention that LEVEL uses recycled materials to reduce the environmental footprint.

Blue Sign

State that Blue Sign ensures safe chemical use and responsible resource management.

Oekotex

Say that Oekotex guarantees fabrics are free from harmful chemicals, ensuring safety for users.

PFC Free

Highlight that LEVEL's fabrics are free from PFCs, protecting both the wearer and the environment.

- 100% SAFE, ECO-FRIENDLY FABRICS.
- PROTECTION FOR PEOPLE AND THE ENVIRONMENT.
- RESPONSIBLE RESOURCE USE.

MEMBRANES & PROTECTION FROM WATER

LEVEL gloves are equipped with advanced waterproof membranes, designed to keep hands dry, warm, and comfortable in any weather. These membranes are placed between the outer layer of the glove and the insulation, creating a waterproof barrier while maintaining breathability.

- **WHY MEMBRANES MATTER:**

WATERPROOF PROTECTION: The membrane prevents water from seeping into the glove, ensuring that hands stay dry even in wet conditions.

BREATHABILITY: The membrane allows moisture to escape, so hands remain comfortable and dry, without overheating during intense activity.

DURABILITY: LEVEL's membranes are designed for long-lasting performance, withstanding harsh outdoor conditions.

- **TYPES OF MEMBRANES:**

GORE-TEX: The innovative ePE membrane provides durable waterproof, windproof, and breathable protection, ensuring long-lasting performance while being PFAS-free and eco-friendly. GUARANTEED TO KEEP YOU DRY, it blocks wind to preserve warmth and allows moisture to escape, keeping your hands dry and comfortable. The materials used are rigorously tested for extended durability, reducing resource consumption over time. With a lower carbon footprint, the laminate incorporates XX% recycled textiles and undyed fabrics to minimize environmental impact. It is also Bluesign® approved and OEKO-TEX® Standard 100 certified for safe, responsibly sourced materials.

GORE-TEX INFINIUM WINDSTOPPER: Completely windproof, ensuring hands stay protected from wind chill, even in extreme gales.

MEMBRA-THERM GREEN: A 100% recycled membrane that offers both waterproofing and breathability, maintaining warmth and comfort.

MEMBRA-THERM PLUS: A highly breathable membrane that forms a waterproof barrier while optimizing warmth.

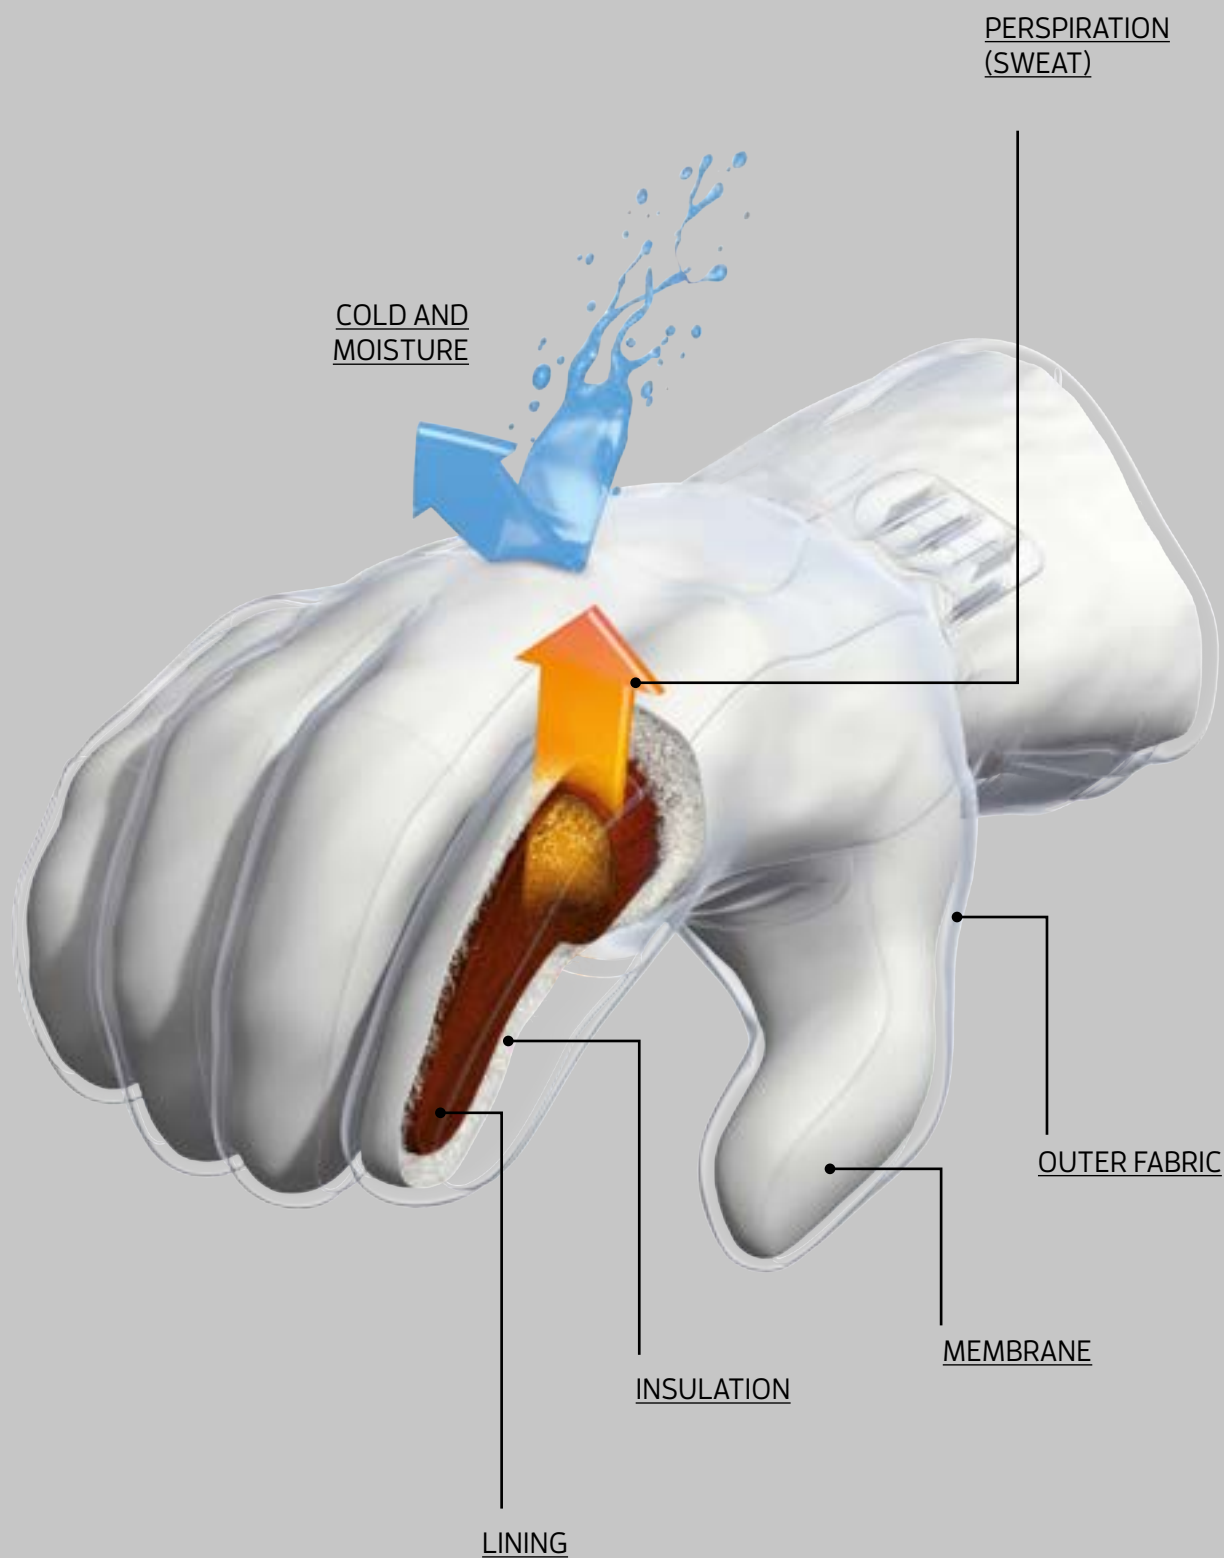

- **WATERPROOF TREATMENTS:**

LEATHER TREATMENT: LEVEL applies a special waterproofing treatment to leather gloves, making them resistant to moisture while maintaining durability.

FABRIC TREATMENT: A breathable waterproof membrane is laminated to the fabric, enhancing warmth and comfort while keeping hands dry. Importantly, this treatment is PFC-free, meaning it does not use harmful chemicals, making it an eco-friendly option.

HOW THE MEMBRANE PROTECTS AGAINST COLD AND MOISTURE

INSULATION MATERIALS

At LEVEL, we understand the importance of keeping hands warm and comfortable in all winter conditions. We offer a range of premium insulation materials that provide excellent warmth, comfort, and breathability. Many of these materials are also environmentally friendly, made from recycled or organic sources.

• ORGANIC INSULATION MATERIALS:

SWISS WOOL:

- Natural and Sustainable: Sourced from the Swiss company Fiwo, which shares LEVEL's values for environmental responsibility.
- Antimicrobial and Odor-Resistant: The thin fibers do not retain odors and keep hands dry by drawing moisture away from the skin.

MERINO WOOL:

- Natural Temperature Regulation: This wool keeps hands warm and dry, making it perfect for high-performance activities.
- Soft and Comfortable: Its natural properties ensure warmth without overheating.

• RECYCLED INSULATION MATERIALS:

PRIMALOFT:

- Water-Repellent: Unlike down, PrimaLoft won't absorb water, ensuring warmth even when wet.
- Soft and Breathable: Provides a warm and comfortable feel while allowing moisture to escape.

PRIMALOFT THERMOPLUME:

- Fully Recycled Alternative to Down: Made from 100% post-consumer recycled materials, this is a sustainable insulation that mimics the warmth and softness of down.

RECYCLED LOFT:

- 100% Recycled Content: Provides excellent thermal insulation while optimizing warmth and comfort using recycled materials.

LOFT PREMIUM:

- Soft and Warm: This new insulation by LEVEL combines a soft feel with great thermal benefits for added comfort.

• OTHER HIGH-PERFORMANCE INSULATIONS:

POLARTEC:

- 4-Way Stretch and Breathable: Offers warmth without weight and unrestricted freedom of movement, making it ideal for active use.
- Wind-Resistant: Keeps hands warm while reducing the effects of wind chill.

THINSULATE™:

- Efficient Heat Trapping: Its microfibers are ten times smaller than other synthetic insulations, making it excellent at trapping warmth.
- Prevents Cold Spots: Fills airspaces in the gloves to avoid cold spots and ensure consistent warmth.

THINSULATE™ PLATINUM:

- Exceptional Warmth and Water Resistance: Made from synthetic hydrophobic fibers, this insulation keeps hands warm and dry.
- Soft and Versatile: Available in different gram weights, providing options for various needs and climates.

LEVEL INSULATION: ETHICAL WARMTH FOR EVERY CONDITION

At LEVEL, our insulation technologies blend warmth, comfort, and sustainability. Whether it's the ethical innovation of PrimaLoft ThermoPlume, the natural advantages of Swiss Wool by Fiwo, or the long-lasting freshness of Polygiene, each material is carefully selected to provide high performance in extreme conditions while reducing our environmental impact. These advanced insulations ensure that every LEVEL glove offers maximum comfort, durability, and responsible sourcing.

PrimaLoft ThermoPlume

100% Recycled Materials
Sustainable Alternative to Down
Trusted by Over 70 Brands Worldwide

Swiss Wool by Fiwo

Local Sourcing and Environmentally Conscious Partners
Organic and Antimicrobial Insulation
Keeps Hands Warm and Dry Naturally

Polygiene

Prevents Odor with Silver Salt Technology
Extends Product Lifespan by Inhibiting Bacteria
Lifetime Freshness for Long-Lasting Comfort

- SUSTAINABLE INSULATION SOLUTIONS TAILORED FOR PERFORMANCE.
- NATURAL AND SYNTHETIC OPTIONS FOR EVERY NEED AND ENVIRONMENT.
- PROLONGED PRODUCT LIFESPAN WITH ODOR AND MOISTURE CONTROL, ENSURING LASTING COMFORT AND FRESHNESS.

RACING

Our racing line embodies the very essence of our brand—youthful, dynamic, and at the cutting edge of style and performance. We've meticulously crafted a range of ski models that not only meet but exceed the most demanding performance standards, all while ensuring that warmth and comfort are never compromised.

Directly from the World Cup courses, our racing line represents the pinnacle of innovation, pushing the boundaries of what's possible in competitive skiing. Join us as we redefine what it means to achieve all-out performance, setting new standards in style, comfort, and race-winning technology. Welcome to the future of racing with LEVEL.

CATEGORY HIGHLIGHTS

The LEVEL Racing Collection are World Class simply the best available in the market today. The Racing collection has dynamic cutting-edge styles that always deliver the best all-out performance. Racers need warmth as well as protection so materials like wool linings, Superfabric and Dyneema stitching are all utilized. WC and SQ Models can be heated for a Custom Fit.

WORLDCUP CF MITT

CODE: 3002UM | **SIZE:** 6 (XXS) / 10 (XXL)

DESCRIPTION: Designed for athletes who face the most demanding race courses, the Worldcup Mitt redefines protection and performance. The new 26–27 design features a reinforced thumb support to absorb impacts and reduce injuries during falls.

WARMTH INDEX: 4000 – Very Warm

FIT: Natural **CUFF TYPE:** Hybrid

MATERIAL: Waterproof goat leather, Superfabric, Waterproof goat leather palm **INSULATION:** Thinsulate, Wool lining with Polygiene treatment

HIGHLIGHTS: Special gate protection, Dynamic thumb guard, Kirax Stimulator System **FEATURES:** Sublimation on back, Silicone grip, Dyneema stitching, Superfabric, Dynamic thumb guard, Custom Fit, Tubes 3D protection technology, Graphene lining, Finger lining inside

CUSTOM FIT

This new unique system gives the opportunity to customize the glove/mitten to the anatomical shape of the hand.

WOOL LINING

Wool is an excellent insulator, resistant and breathable, it is naturally absorbent and does not capture odors. Thanks to these unique characteristics, it is one of the favorite materials for our linings.

THINSULATE™

The microfibres of Thinsulate™ insulation are ten times smaller than the fibres of other synthetic insulations, which means they're much more efficient at trapping air and keeping in the warmth.

POLYGIENE®

With Polygiene® Stays Fresh Technology, enjoy fresh-all-day confidence. Polygiene makes your glove/mitten stay fresh!

IMPACT PROTECTION

Knuckles and underside of cuff are comprised with a specific anti-shocking material for improved protection and are reinforced with abrasion resistant fabric for top durability.

AEROGEL INSULATION — NASA TECHNOLOGY

Now introduced in the Racing collection, AEROGEL insulation — originally developed by NASA for astronaut gloves — provides unmatched thermal protection in extreme cold.

GRAPHENE LINING

Graphene offers perfect thermoregulation as it distributes the heat evenly. It is antibacterial and very breathable.

ERGONOMIC THUMB CONSTRUCTION

Introduced on the flagship World Cup Mitt and World Cup 5-Finger, this new ergonomic thumb design offers dual benefits: dynamic support with excellent flex and built-in shock absorption in case of impact.

SUPERFABRIC®

SuperFabric® is a material that's longer lasting, has higher durability, and is designed for everything from extreme applications to rugged daily usage.

SPECIFIC PALM CUT

The improved palm-shape facilitates gripping ski poles and offers better sensibility.

KIRAX STIMULATOR SYSTEM

This innovative technology stimulates the body's neurological system in a unique way to enhance reaction time, performance, and a sense of general well-being.

DYNEEMA STITCHING

Dyneema Stitching elevates LEVEL ski racing gloves. Our outside stitching delivers an impeccable fit, ensuring superior grip and absolute dexterity. Experience precision and control with every run.

ENHANCED FLEX ON BACKHAND

A new flexible structure on the back of World Cup Mitt and World Cup Finger provides superior dexterity, reducing hand fatigue during pole grip while ensuring extra protection thanks to Superfabric® reinforcements.

SUBLIMATION PRINTING

High-resolution prints on both backs for a trendy-inspired glove/mitt.

WORLD CUP CF

CODE: 3002UG | SIZE: 6 (XXS) / 10 (XXL)

DESCRIPTION: Built for the speed and precision of World Cup racing, the Worldcup CF glove delivers uncompromising protection and control.

WARMTH INDEX: 3000 - Warm

FIT: Natural **CUFF TYPE:** Hybrid

MATERIAL: Waterproof goat leather, Superfabric, NexX4, Waterproof goat leather palm **INSULATION:** Thinsulate, Wool lining with Polygiene treatment **HIGHLIGHTS:** Special gate protection, Dynamic thumb guard, Kirax Stimulator System **FEATURES:** Sublimation on back, Outside stitching, Silicone grip, Dyneema stitching, Superfabric, NexX4, Dynamic thumb guard, Custom Fit, Graphene lining, Durashield on back cuff

INDEX PROTECTION

Our new Index Protection - robust knuckle protection on the index finger's side, designed with anti-shock material for enhanced safety. Further reinforced with high-durability, abrasion-resistant fabric.

ERGONOMIC THUMB CONSTRUCTION

Introduced on the flagship World Cup Mitt and World Cup 5-Finger, this new ergonomic thumb design offers dual benefits: dynamic support with excellent flex and built-in shock absorption in case of impact.

CUSTOM FIT

This new unique system gives the opportunity to customize the glove/mitten to the anatomical shape of the hand.

KIRAX STIMULATOR SYSTEM

This innovative technology stimulates the body's neurological system in a unique way to enhance reaction time, performance, and a sense of general well-being.

SQ CF

CODE: 3018UG | **SIZE:** 6,5 (XS) / 10 (XXL)

DESCRIPTION: The SQ CF is built for skiers who demand speed, precision, and maximum protection. The latest 26–27 generation introduces increased Superfabric protection on the backhand and thumb to withstand gate impacts.

WARMTH INDEX: 3000 - Warm

FIT: Natural **CUFF TYPE:** Hybrid

MATERIAL: Waterproof goat leather, Superfabric, Waterproof goat leather palm

INSULATION: Thinsulate, Wool lining with Polygiene treatment **HIGHLIGHTS:** Knuckle protection, Kirax Stimulator System **FEATURES:** Sublimation on back, Outside stitching, Silicone grip, Dyneema stitching, Superfabric, Custom Fit, Graphene lining, Durashield on back cuff

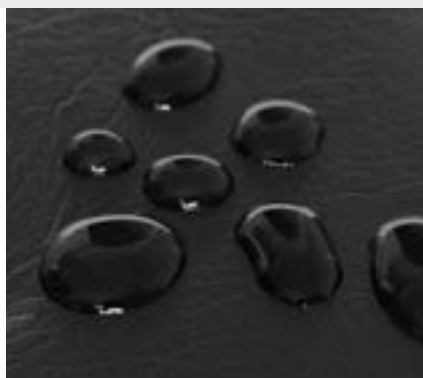

SUPERFABRIC®

SuperFabric is a material that's longer lasting, has higher durability, and is designed for everything from extreme applications to rugged daily usage.

WATERPROOF GOAT LEATHER

A soft waterproof leather, used mainly for ski gloves in areas which are exposed to high abrasion such as the palms or between the thumb and index finger.

PULLER

A wider puller inserted in underside of cuff helps to properly wear the glove/ mitten

SPECIFIC PALM CUT

Dyneema stitching elevates the performance of LEVEL racing gloves. The external seams provide an impeccable fit and superior grip, ensuring absolute dexterity and precision. Combined with the improved palm shape.

MULTY DISPLAY: A POWERFUL TOOL FOR SHOWCASING LEVEL RACING PRODUCTS

Our new MULTY DISPLAY is designed to bring the excitement of LEVEL racing products directly into your store. This display is an essential tool for store owners and Level reps, offering an organized, eye-catching way to showcase our high-performance gloves, mittens, backpacks, and apparel. With vibrant images of our athletes in action, it creates an immersive experience that captures the attention of both ski enthusiasts and racers alike.

ENHANCED BRAND PRESENCE: It elevates the Level brand in-store, aligning perfectly with our strong racing heritage and connecting customers with the athletes they admire.

MAXIMIZED VISIBILITY: The clear, structured layout ensures products are presented in a way that drives attention and boosts sales. Each product has its own dedicated space, making it easy for customers to find exactly what they need.

PROFESSIONAL APPEAL: The sleek design reflects the high-quality craftsmanship of LEVEL, reinforcing the premium nature of our products while creating a standout racing corner in any store.

CD: 9044PO

LEATHER

The men's Leather is fresh and with clean new lines. Rich in details and solutions provided by the athletes who launch the latest trends. The materials used are of the highest quality, including ultra-soft leather combined with high quality details. The insulation and liners are the best available on the market.

CATEGORY HIGHLIGHTS

The LEVEL Men's Leather collection is sophisticated and sporty with clean design elements. Rich in details, like the ultra-soft leather, precise stitching and Soft Touch Lining with Polygiene treatments make this line best in class with high quality details. JAG

CODE: 3064UG | **SIZE:** 7 (S) / 10 (XXL)

DESCRIPTION: New design for an icon in our catalogue. Jag is back on the market with a modern sporty look. This model is perfect for deep turns on icy pistes and offers exceptional comfort due to its soft leather and great fit.

WARMTH INDEX: 3000 - Warm

FIT: Natural **CUFF TYPE:** Under jacket

MATERIAL: Water resistant micro fabric, Waterproof goat leather palm

INSULATION: Thinsulate, Hydrofill **HIGHLIGHTS:** Safety Leash **FEATURES:** Short cuff, Hook&loop closure, Flex palm construction, Safety leash

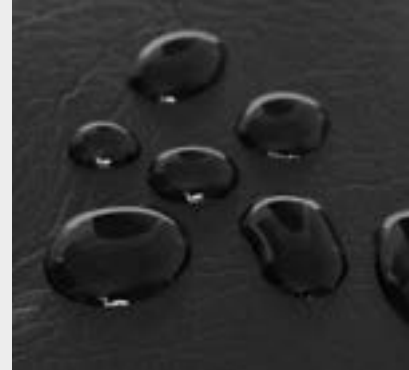

THINSULATE™

The microfibres of Thinsulate™ insulation are ten times smaller than the fibres of other synthetic insulations, which means they're much more efficient at trapping air and keeping in the warmth.

WATERPROOF GOAT LEATHER

A soft waterproof leather, used mainly for ski gloves in areas which are exposed to high abrasion such as the palms or between the thumb and index finger.

SAFETY STORM LEASH

A new leash concept that offers an increased safety feature for riders and skiers.

FLEX PALM®

Flex Palm provides superior flexibility to the palm of the glove. Made from stretchy goat leather, the Flex Palm ensures a comfortable fit and optimal freedom of movement, allowing for high performance in any situation.

LOTUS

CODE: 3307UG | **SIZE:** 7 (S) / 11 (4XL)

DESCRIPTION: The Lotus is an elegant, high-performance glove designed for skiers who value warmth, durability, and sustainability. Warmth, performance, grip, fit, waterproof, insulation, design.

WARMTH INDEX: 3000 - Warm

SUSTAINABLE VALUE: Rate ★★★★★ 66% Recycled 4% Organic

FIT: Natural **CUFF TYPE:** Hybrid

MATERIAL: Water resistant fabric, Reinforced leather palm **INSULATION:**

Fiberfill, Recycled Hydrofill **DRY TECHNOLOGY:** Membra-Therm Green

HIGHLIGHTS: Storm Leash **FEATURES:** Short cuff, Adjustable strap, Storm leash

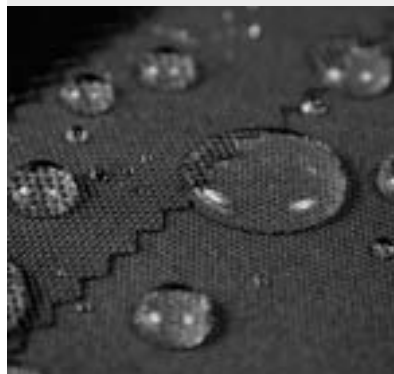

MEMBRA-THERM GREEN

An 100% recycled breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

ADJUSTABLE STRAP

This closing system makes it easy to fit under jackets therefore offering a better closure.

WATERPROOF FABRIC TREATMENT

The fabric is laminated with a process that permits to add a breathable waterproof membrane to the outer material, optimizing warmth and comfort while keeping the hands dry.

STORM LEASH

This cord is used to secure the glove to your hand with an adjustable plastic. A big advantage when you don't want to wear gloves but want to keep them attached to the wrist.

HAWK

CODE: 3373UG | **SIZE:** 7 (S) / 10 (XXL)

DESCRIPTION: The new Hawk features Membra-Therm Green technology and recycled materials, offering warmth and dryness. Its timeless design with Level Logo webbing is ideal for eco-friendly winter sports enthusiasts.

WARMTH INDEX: 2000 - Standard

SUSTAINABLE VALUE: Rate ★★★★★ 75% Recycled 11% Organic

BIG MOUNTAIN

CODE: 2049UM | **SIZE:** S / XXL

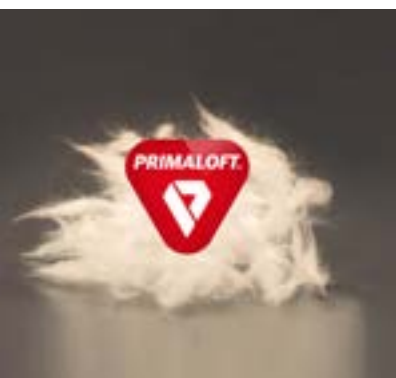

DESCRIPTION: The Big Mountain from our Mountain Line is designed for extreme cold up to -30°C with a Thermoplus index of 5000 and Multilayer Primaloft technology. It features a goat leather palm and an adjustable cuff, tested by elite mountaineers.

WARMTH INDEX: 5000 - Extra Warm

FIT: Relaxed **CUFF TYPE:** Over jacket

MATERIAL: Water resistant fabric, Leather reinforcement patch **INSULATION:** Multilayer Primaloft, Hydrofill **HIGHLIGHTS:** Storm Leash

FEATURES: Long adjustable cuff, Storm leash

MULTILAYER PRIMALOFT®

Soft insulation fabric. An insulation that is water repellent! Unlike down, it won't hold water so it even keeps you warm when it's wet! A warm and soft feeling that offers good breathability.

ELASTIC CORD

This elastic cord seals from the outside environment when the snow is deep and the weather is foul. The cuff goes completely over your jacket sleeve and cinch's tight with the cord.

LONG CUFF

Long gauntlet-style glove offers higher insulation and seals out the cold very effectively thanks to a draw cord.

STORM LEASH

This cord is used to secure the glove to your hand with an adjustable plastic. A big advantage when you don't want to wear gloves but want to keep them attached to the wrist.

53 dark

ALASKA MITT

CODE: 2071UM | **SIZE:** 6,5 (XS) / 10 (XXL)

DESCRIPTION: The Alaska Mitt offers unmatched warmth down to -30°C with a Thermoplus 5000 rating, Swiss wool, and silk lining with Polygiene. Features a zip for versatile wear and a preformed shape for maximum comfort and grip.

WARMTH INDEX: 5000 - Extra Warm

FIT: Relaxed **CUFF TYPE:** Hybrid

MATERIAL: Water resistant soft fabric, Waterproof goat leather palm **INSULATION:** Swiss Wool, Merino wool lining with Polygiene treatment

HIGHLIGHTS: Brand Leash **FEATURES:** Safety leash, Zipped cuff, Hook&loop closure, Preformed glove, Nose cleaner

SWISS WOOL

This natural material is characterized by thin fibres which do not retain odours making this type of wool antimicrobial. Wool provides warmth and draws sweat away from the skin, keeping a sensation of dryness.

PREFORMED FINGERS

This is a special anatomical construction that permits a preformed shape. The preformed shape reduces wrinkles on the palm and guarantees better fit and sensitivity.

SAFETY STORM LEASH

A new leash concept that offers an increased safety feature for riders and skiers.

POLYGIENE®

With Polygiene® Stays Fresh Technology, enjoy fresh-all-day confidence. Polygiene makes your glove/mitten stay fresh!

RANGER

CODE: 209IUG | **SIZE:** 7 (S) / 10 (XXL)

DESCRIPTION: The Ranger features Membra-Therm Plus for waterproofing and goat leather palm for durability. With a zipper for hand warmers or ventilation, a safety leash, and I-Touch System for smartphones, it's perfect for alpinists and skiers.

WARMTH INDEX: 4000 - Very Warm

FIT: Relaxed **CUFF TYPE:** Over jacket

MATERIAL: Water resistant fabric, Waterproof goat leather palm **INSULATION:** Level Needle, Boa fleece inside **DRY TECHNOLOGY:** Membra-Therm Plus **HIGHLIGHTS:** I-Touch system, Ranger Leash **FEATURES:** Long cuff, Safety leash, Nose cleaner, H&R, Adjustable strap, Heater pocket

MEMBRA-THERM PLUS

A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

MULTIFUNCTION POCKET

Pocket positioned on the top of the glove. May be used to insert hand warmers, ski-pass or other small objects. If unzipped during warm days it allows better air circulation thanks to the inner mesh.

FLEX PALM

The elastic cordura insert on the palm allows for a better fit, more flexibility and a cozy feeling.

I-TOUCH SYSTEM

The "I-Touch" system allows you to use your smart phone without having to remove the glove.

OFF PISTE N4 MITT

CODE: 1105UM | SIZE: S / XXL

DESCRIPTION: The Off Piste N4 Mitt sets a new standard for freeriders and snowboarders in extreme conditions. Built with goat leather and NexX4™ palm reinforcement, it provides unbeatable grip and abrasion resistance, even on the iciest slopes.

WARMTH INDEX: 4000 - Very Warm

FIT: Relaxed **CUFF TYPE:** Under jacket

MATERIAL: Waterproof goat leather NexX4™ palm **INSULATION:** Swiss Wool, Soft-touch lining with Polygiene treatment **HIGHLIGHTS:** Brand Leash **FEATURES:** Short neoprene cuff, Safety leash, Carabiner, Finger lining inside

WATERPROOF GOAT LEATHER

A soft waterproof leather, used mainly for ski gloves in areas which are exposed to high abrasion such as the palms or between the thumb and index finger.

SWISS WOOL

This natural material is characterized by thin fibres which do not retain odours making this type of wool antimicrobial. Wool provides warmth and draws sweat away from the skin, keeping a sensation of dryness.

SAFETY STORM LEASH

A new leash concept that offers an increased safety feature for riders and skiers.

BIOMEX WRIST PROTECTION

THE BEST IN CLASS FOR SAFETY AND COMFORT Stay safe and ride longer with LEVEL's Biomex wrist protection. Whether you're a beginner or an experienced rider, Biomex wrist protection can help reduce injuries and keep you on the slopes. Unlike most wrist guards, Biomex is the only system that keeps your wrist in an anatomically strong position, combining ergonomics and freedom of movement with optimal stability.

• WHY CHOOSE BIOMEX?

ERGONOMICALLY DESIGNED: Biomex is the only wrist guard that maintains the wrist in a natural, strong position. This unique design minimizes the risk of injury by supporting the wrist where muscle forces and bone alignment work together to offer maximum stability.

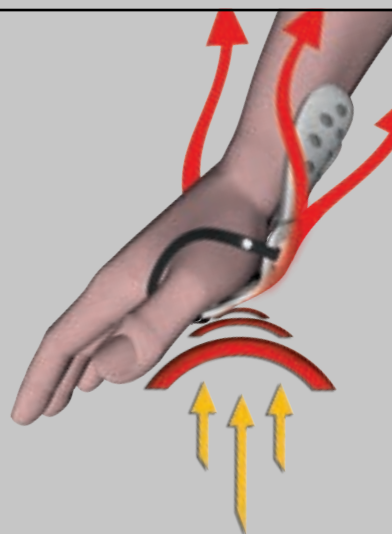

PROTECTION FROM ALL DIRECTIONS: While most wrist guards only protect against hyper-extension, Biomex addresses all three forces that can lead to injury.

1. Hyper-extension (back of hand pushed toward the forearm)
2. Pronation (twisting inward)
3. Radial Adduction (sideways twisting). This makes Biomex a superior choice for preventing wrist fractures.

REDUCES RISK BY 7.5 TIMES: Clinical tests have shown that Biomex Plus reduces wrist injuries up to 7.5 times compared to standard wrist guards.

Most wrist guard

Biomex protection

• SPECIFIC DESIGNS FOR EVERY RIDER

SNOWBOARDERS: Designed with a new ergonomic shape for better comfort and movement. It works with or without removable liners, thanks to a self-adjusting mesh system.

WOMEN: Biomex has a specific fit for women, ensuring better comfort and protection designed specifically for women's hands.

SKIERS (FREESKI BIOMEX EVOLUTION): Shorter and made from harder material, it fits anatomically with the hand for skiers, offering durable and tailored protection.

SPECIFIC WOMEN'S FIT

FREESKI BIOMEX EVOLUTION

• HOW DOES WRIST INJURY HAPPEN?

Falls on the slopes can result in a wrist hyper-extension (when the back of the hand is pushed toward the forearm), often combined with twisting forces like pronation or radial adduction. This combination is what typically causes wrist injuries such as fractures.

• HOW BIOMEX HELPS?

Biomex stands out because it addresses all three of these forces—unlike standard wrist guards, which only target hyper-extension. This unique design reduces the likelihood of injury and keeps you riding safely.

TÜV Certified Technology

Ol black

SUPER PIPE GTX

CODE: I005UG | **SIZE:** 7 (S) / 10 (XXL)

DESCRIPTION: High-tech glove with Biomex Protection System for wrist safety, SuperFabric for abrasion resistance, GORE-TEX for warmth and dryness, Cordura palm for grip, and goggle cleaner on index finger.

WARMTH INDEX: 4000 - Very Warm

FIT: Relaxed **CUFF TYPE:** Over jacket

GORE-TEX

The innovative ePE membrane provides durable waterproof, windproof, and breathable protection, ensuring long-lasting performance while being PFAS-free. It blocks wind to preserve warmth and allows moisture to escape, keeping your hands dry and comfortable.

SUPERFABRIC®

SuperFabric® is a material that's longer lasting, has higher durability, and is designed for everything from extreme applications to rugged daily usage.

POWDER CUFF

This nylon cuff has a convenient adjustment for the closure around the wrist preventing snow from getting inside when riding powder.

A REVOLUTIONARY PROTECTION TECHNOLOGY

NexX4™ offers a lightweight, durable, and grippy transparent Hi-Tech material for ultimate customization and performance. NexX4™ is a trademark (2023) of JV International srl

NexX4™

REVOLUTIONIZING PROTECTION TECHNOLOGY

Introducing NexX4™, a groundbreaking technology debuting this year in the protection segment, specifically designed for Level's Super Pipe gloves. Developed and patented by JV International, NexX4™ is set to redefine the standards for performance and protection in extreme sports.

NexX4's formula makes possible to boost and achieve simultaneously 4 essential benefits within the same outcome: grip, lightness, durability, unlimited graphic design; while keeping all these features at wide temperature ranges.

KEY FEATURES:

- **MATERIAL INNOVATION:**
NexX4's unique essential benefits:

				
SECURE GRIP	INCREDIBLE LIGHTNESS	LONG-LASTING DURABILITY	DESIGN FLEXIBILITY	COLD RESISTANCE
Enhanced grip for secure board handling during tricks.	A feather-light feel that maintains durability.	Engineered to endure the challenges of extreme sports.	Allows for vibrant colors and custom designs without compromising functionality.	Designed to perform well in cold temperatures, ensuring consistent functionality.

- **TECHNOLOGY INNOVATION:**
NexX4™ enables the creation of unique products, pushing the boundaries of design and functionality.
- **DESIGN INNOVATION:**
NexX4™ rethinks material integration, transforming how gloves are created. This approach fosters products that combine functionality with an appealing style.
- **CONSUMER BENEFIT:**
NexX4™ embodies a revolutionary approach to glove technology, seamlessly combining grip, lightness, durability, and design flexibility across varying temperatures. This versatility positions NexX4™ as a game-changer in the world of extreme sports.

MULTILAYER PRIMALOFT®

Soft insulation fabric. An insulation that is water repellent! Unlike down, it won't hold water so it even keeps you warm when it's wet! A warm and soft feeling that offers good breathability.

MEMBRA-THERM PLUS

A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

COZY FUR

Stay warm and cosy. A thick fur cuff for optimum warmth and comfort. This model is ideal for adding a touch of glamour to your winter looks.

CONSTRUCTION 3D

This is a special anatomical construction that permits a preformed shape. The preformed shape reduces wrinkles on the palm and guarantees better fit and sensitivity.

COCO MITT

CODE: 8104WM | **SIZE:** XS / L

DESCRIPTION: The Coco Mitt is one of the warmest and strongest models of our Women's Line. Thanks to its sheep leather lining, this mitten is extremely soft and comfortable, even after a full day on the ski slopes. Membra-Therm Plus and Multilayer Primaloft technology make the Coco Mitt waterproof. In addition, Polygiene fabrics are used to avoid the formation of bacteria in the inner part of the glove. The short cuff is enriched with fur to make it cosy and to keep cold air from getting into the mitten. The design has been updated without losing the iconic look of one of the best-selling gloves in our catalogue.

WARMTH INDEX: 4000 - Very Warm

SUSTAINABLE VALUE: Rate ★★★ 25% Recycled 38% Organic

FIT: Natural **CUFF TYPE:** Under jacket

MATERIAL: Water resistant sheep leather, Water resistant sheep leather palm **INSULATION:** Multilayer Primaloft, Merino wool lining with Polygiene treatment **DRY TECHNOLOGY:** Membra-Therm Plus **HIGHLIGHTS:** Storm Leash **FEATURES:** Cuff with fur inside, Storm leash

CORAL MITT

CODE: 8I78WM | **SIZE:** XS / L

DESCRIPTION: As soon as this mitten landed on our catalogue, it became a favourite among the women in our Snowboard and Freeride team. The Membra-Therm Plus technology makes sure that this model is always warm and dry. This system separates the inner part from the outer layer, keeping away the wet feeling on a cold day. The short cuff can be easily worn underneath your ski jacket, preventing cold air from getting inside. The silicone details on the palm ensure that the grip is always at its best in every situation. The Coral Mitt is available in different colour versions, filled with its young and smart soul.

WARMTH INDEX: 3000 - Warm

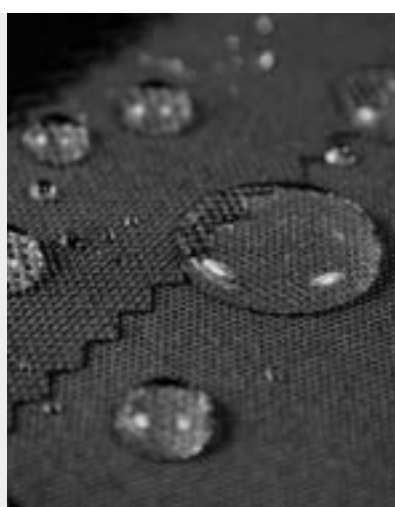

FIT: Relaxed **CUFF TYPE:** Under jacket

MATERIAL: Water resistant sublimated fabric, Silicone printed palm **INSULATION:** Level Loft, Hydrofill **DRY TECHNOLOGY:** Membra-Therm Plus **HIGHLIGHTS:** Storm Leash **FEATURES:** Knitted cuff, Storm leash

MEMBRA-THERM PLUS

A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

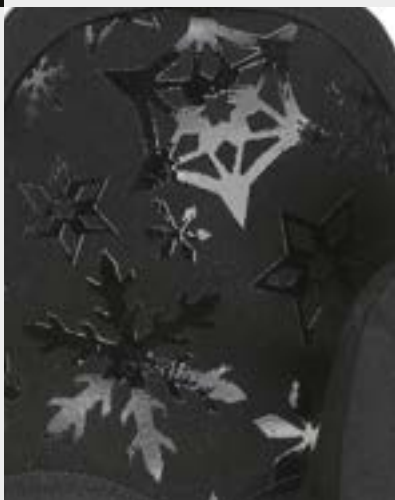

WATERPROOF FABRIC TREATMENT

The fabric is laminated with a process that permits to add a breathable waterproof membrane to the outer material, optimizing warmth and comfort while keeping the hands dry.

SILICONE PRINTED PALM

A silicone pattern applied to the palm. Provides excellent waterproofing, improved sensitivity, and exceptional grip.

STRETCH KNITTED CUFF

Our stretch knitted cuff offers a snug, comfortable fit that seals out cold and snow. Its flexibility ensures easy glove entry and a secure, draft-free seal.

SUBLIMATED DESIGN

Different motifs are digitally printed on both shells for a trendy-inspired glove.

SHORT GAUNTLET STYLE

The short under-cuff can easily be tucked into your ski jacket for more agility and less bulk getting in your way of wrist movement.

LUNA

CODE: 3244WG | **SIZE:** 6 (XXS) / 8,5 (M-L)

DESCRIPTION: The Luna W offers sleek style and high performance for women skiers. Primaloft® insulation and Membra-Therm Green ensure Thermo-Plus 4000 warmth, while waterproof goat leather and antibacterial lining provide comfort, grip, and lasting freshness.

WARMTH INDEX: 4000 - Very Warm

SUSTAINABLE VALUE: Rate ★★★★★ 50% Recycled 17% Organic

FIT: Natural **CUFF TYPE:** Under jacket

MATERIAL: Water resistant goat leather, Waterproof goat leather palm **INSULATION:** Multilayer Primaloft, Soft-touch lining with Polygiene treatment **DRY TECHNOLOGY:** Membra-Therm Green **HIGHLIGHTS:** Safety Leash **FEATURES:** Short neoprene cuff, Adjustable strap, Flex palm construction, Safety leash

MULTILAYER PRIMALOFT®

Soft insulation fabric. An insulation that is water repellent! Unlike down, it won't hold water so it even keeps you warm when it's wet! A warm and soft feeling that offers good breathability.

MEMBRA-THERM GREEN

An 100% recycled breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

INNOVATIVE PALM INSERT

An elastic insert delivers two major advantages, greater palm stretch for improved flexibility and reduced bulk when gripping the pole.

ADJUSTABLE STRAP

This closing system makes it easy to fit under jackets therefore offering a better closure.

WARMSTER JR GTX

CODE: 4194JG | **SIZE:** 4 (JR XXS) / 7 (JR XXL)

DESCRIPTION: The Warmster JR GT offers pro-level comfort and protection. A Gore-Tex membrane ensures waterproof performance, while Primaloft® insulation delivers Thermo-Plus 4000 warmth. A leather palm and long cuff provide grip, durability, and snow defense.

WARMTH INDEX: 4000 - Very Warm

SUSTAINABLE VALUE: Rate ★★★★★ 69% Recycled 6% Organic

FIT: Natural **CUFF TYPE:** Hybrid

MATERIAL: Water resistant fabric, Waterproof goat leather palm **INSULATION:** Multilayer Primaloft, Hydrofill **DRY TECHNOLOGY:** GORE-TEX **HIGHLIGHTS:** Junior Leash **FEATURES:** Adjustable cuff and strap, Safety leash

GORE-TEX

THE INNOVATIVE ePE membrane provides durable waterproof, windproof, and breathable protection, ensuring long-lasting performance while being PFAS-free. It blocks wind to preserve warmth and allows moisture to escape, keeping your hands dry and comfortable.

WATERPROOF FABRIC TREATMENT

The fabric is laminated with a process that permits to add a breathable waterproof membrane to the outer material, optimizing warmth and comfort while keeping the hands dry.

REINFORCED LEATHER PALM

Abrasion-resistant goat leather patches on palm and index finger for both stretch and durability.

SAFETY STORM LEASH

A new leash concept that offers an increased safety feature for riders and skiers.

GORE-TEX

The innovative ePE membrane provides durable waterproof, windproof, and breathable protection, ensuring long-lasting performance while being PFAS-free. It blocks wind to preserve warmth and allows moisture to escape, keeping your hands dry and comfortable.

MULTILAYER PRIMALOFT®

Soft insulation fabric. An insulation that is water repellent! Unlike down, it won't hold water so it even keeps you warm when it's wet! A warm and soft feeling that offers good breathability.

WATERPROOF FABRIC TREATMENT

The fabric is laminated with a process that permits to add a breathable waterproof membrane to the outer material, optimizing warmth and comfort while keeping the hands dry.

ADJUSTABLE STRAP

This closing system makes it easy to fit under jackets therefore offering a better closure.

VERTIGO MITT TEEN

CODE: 2375JM | **SIZE:** 4 (JR S) / 8 (JR XXL)

DESCRIPTION: The perfect mitten for young free-riders. Design, warmth and durability are the main features of the perfect mitten for young free-riders and snowboarders. Very similar to its adult version, the Vertigo Jr has been designed to provide the best possible thermal resistance. With a Thermoplus 3000 index, this model can keep your hands warm down to -17°C below zero. The Membra-Therm Plus system keeps your hands not only warm but also dry, thanks to the separation of the inner lining from the external layers. The design is unique and cannot go unnoticed. We collaborated with American freestyle skier Alex Ferreira to develop his Pro Model version.

WARMTH INDEX: 3000 - Warm

FIT: Natural **CUFF TYPE:** Hybrid

MATERIAL: Water resistant strong fabric, Waterproof goat leather palm **INSULATION:** Fiberfill, Fleece **DRY TECHNOLOGY:** Membra-Therm Plus **HIGHLIGHTS:** Junior Leash **FEATURES:** Short cuff, Hook&loop closure, Safety leash

MEMBRA-THERM PLUS

A highly breathable membrane insert that creates a waterproof barrier between exterior layer of the glove and the insulating materials. It optimizes warmth and comfort by keeping the hands dry.

WATERPROOF GOAT LEATHER

A soft waterproof leather, used mainly for ski gloves in areas which are exposed to high abrasion such as the palms or between the thumb and index finger.

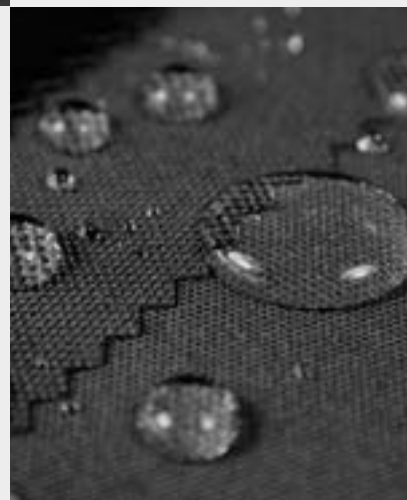

SAFETY STORM LEASH

A new leash concept that offers an increased safety feature for riders and skiers.

WATERPROOF FABRIC TREATMENT

The fabric is laminated with a process that permits to add a breathable waterproof membrane to the outer material, optimizing warmth and comfort while keeping the hands dry.

ADJUSTABLE STRAP

This closing system makes it easy to fit under jackets therefore offering a better closure.

URBAN 20LT

CODE: 7547BP

Where City Lifestyle Meets Outdoor Functionality.

With every design element and functionality considered, the URBAN is the backpack of choice for today's urban explorer. From the intricate detailing in the images to the carefully crafted features, every aspect of this backpack is tailored to cater to the needs and style preferences of the modern individual.

Embark on your daily adventures with the URBAN where smart design meets daily practicality.

AVAILABLE IN FOUR DISTINCT COLORS: Black, Forest, Grey, and Light Blue, so you can match your personal style.

METICULOUSLY PADDED BACK PANEL AND SHOULDER STRAPS: Prioritizing your comfort during prolonged wear.

HIGH-QUALITY CONSTRUCTION: A blend of style and durability ensures your backpack stands the test of time.

PADDED LAPTOP POCKET (UP TO 15"): Securely holds your laptop, providing peace of mind during commutes.

EXTERNAL MESH WATER BOTTLE POCKET: Keeps hydration within arm's reach.

WAIST STRAP AND CHEST STRAP (BOTH ADJUSTABLE): For a stable and customized fit.

HIDDEN BACK ZIP POCKET: Perfect for wallet, passport, or other precious items.

FLAP-APERTURE SYSTEM WITH INNER MESH ZIP POCKET: Allows easy organization.

RAIN COVER SYSTEM: Protects both the backpack and the wearer's head, ensuring total coverage in unexpected weather.

SMALL URBAN 13LT

CODE : 7546BP OI black

Compact Design, Big City Spirit.

From its modern design to its multi-functional features, the SMALL URBAN is curated for the dynamic urbanite. Prioritizing both form and function, it caters to a variety of needs while ensuring you stay stylish on the move. Embrace city life with confidence and flair with the SMALL URBAN by your side.

SOPHISTICATED DARK SHADE: A sleek design that suits the modern city dweller's style.

REFLECTIVE STRIP: Enhances safety during low-light conditions, ideal for evening commutes.

EXTERNAL ZIPPERED POCKET: Convenient and secure storage for your essentials.

MULTIPLE CARRYING MODES: Adapt to backpack, handbag, or crossbody style with ease.

ZIPPER CLOSURE: Keeps your belongings safely tucked away.

HIDDEN BACK COMPARTMENT FOR STRAPS: Carry it as a backpack or shoulder bag; the straps are cleverly concealed in a back zip pocket when not in use.

MULTY USE URBAN 20LT

CODE: 7545BP

The MULTY USE URBAN is tailored for those who seek both functionality and a touch of personality in their backpack. Each design speaks volumes about individuality; while the plethora of features ensures that the bag is as useful as it is stylish. Make a statement; be it at work; school; or during your city explorations with the MULTY USE URBAN.

1. EXCLUSIVE DESIGNS: Ranging from minimalistic to graffiti-inspired; offering a unique style for everyone.

2. PADDED COMFORT: A generously cushioned back panel and shoulder straps for optimal comfort during everyday use.

3. HIGH-QUALITY CONSTRUCTION: Robust and durable; made from premium materials yet lightweight.

4. EXTERNAL ZIPPERED POCKET: Convenient storage for quick-access essentials.

5. EXTERNAL ELASTIC MESH: Perfect for securely holding water bottles or umbrellas.

THE VERSATILE MULTY DISPLAY: A CUSTOMIZABLE SOLUTION FOR ALL LEVEL PRODUCTS

The MULTY DISPLAY is a powerful merchandising tool designed to highlight the wide range of LEVEL products. With its modular design, this display can be customized to meet the needs of any store, offering 5 interchangeable visuals that cover the main product categories: Thermoplus, Green Choice, Racing, Freeskiing, and Women's Collection.

ULTIMATE CUSTOMIZATION: The 5 interchangeable visuals allow you to tailor the display to different product lines, ensuring it aligns with the seasonal or current promotions of each store.

VERSATILE FOR ALL CATEGORIES: Whether showcasing racing gloves, eco-friendly Green Choice products, or freeride and snowboard accessories, the MULTY DISPLAY ensures an ideal and organized presentation of all LEVEL products.

EFFICIENT & ENGAGING LAYOUT: Each graphic is designed to seamlessly integrate with the display, ensuring a clear and professional presentation. The display makes it easier for customers to find products while also reinforcing the LEVEL brand identity.
